ABSTRACT

The purpose of this study is to assess the level of Islamic financial literacy among the undergraduate students of Islamic finance and banking in Universiti Utara Malaysia. It aims to examine the influence of psychosocial factors which are hopelessness, religiosity and financial satisfaction as well as gender towards Islamic financial literacy. Hypothesized relationships are tested using survey response from a sample of 200 respondents. The result of this study shows that the level of Islamic financial literacy of the respondents is high. A significant difference in Islamic financial literacy is found between the respondents according to the gender and the respondents' year of study. Specifically, male have a higher level of Islamic financial literacy compared to female. Meanwhile, the third year's students have a higher level of Islamic financial literacy compared to first year and second year students. Additionally, the result indicates that there is a significant relationship between psychosocial factors and Islamic financial literacy. Moreover, it is found that the religiosity, hopelessness and gender have a significant influence towards Islamic financial literacy. Thus, this study suggests that it is important for the community, university administrators, government and financial advisor to increase the level of Islamic financial literacy by implementing various Islamic financial education programmes. Lastly, this study is considered as one of the studies that have contributed to the literature by developing understanding of Islamic financial literacy. More research related to Islamic financial literacy is suggested to be conducted for future research.

Keywords: Islamic financial literacy, psychosocial, religiosity

ABSTRAK

Tujuan kajian ini adalah untuk menilai tahap kecelikan kewangan Islam dalam kalangan pelajar kewangan dan perbankan Islam di Universiti Utara Malaysia. Ia bertujuan untuk mengkaji kesan faktor-faktor psikososial seperti kekecewaan, keagamaan dan kepuasan kewangan serta jantina terhadap kecelikan kewangan Islam. Perhubungan yang dihipotesiskan diuji menggunakan maklumbalas kaji selidik daripada 200 responden. Dapatan kajian menunjukkan tahap kecelikan kewangan Islam oleh responden adalah tinggi. Didapati terdapat perbezaan yang signifikan antara tahap kecelikan kewangan Islam dengan responden mengikut jantina dan juga tahun pengajian responden. Khususnya, lelaki mempunyai tahap kecelikan kewangan Islam yang lebih tinggi berbanding perempuan. Manakala, pelajar tahun tiga mempunyai tahap kecelikan kewangan Islam yang lebih tinggi berbanding pelajar tahun pertama dan kedua. Selain itu, dapatan kajian juga menunjukkan bahawa terdapat hubungan yang signifikan antara faktor-faktor psikososial dan tahap kecelikan kewangan Islam. Tambahan lagi, didapati bahawa faktor keagamaan, kekecewaan dan jantina mempunyai kesan yang signifikan terhadap tahap kecelikan kewangan Islam. Oleh itu, kajian ini mencadangkan bahawa adalah penting bagi komuniti, pentadbiran universiti, kerajaan dan perunding kewangan untuk meningkatkan tahap kecelikan kewangan Islam dengan melaksanakan pelbagai program pendidikan kewangan Islam. Akhir sekali, kajian ini merupakan salah satu kajian yang menyumbang terhadap karya penulisan dalam meningkatkan pemahaman tentang kecelikan kewangan Islam. Oleh itu, kajian ini menyarankan supaya lebih banyak kajian berkaitan dengan tahap kecelikan kewangan Islam dikendalikan bagi kajian akan datang.

Kata kunci: Kecelikan kewangan Islam, psikososial, keagamaan

ACKNOWLEDGEMENT

All praises and thanks are due to Allah Almighty, Lord of the universe, peace and blessing are upon Muhammad S.A.W., his descendants and his companions. Alhamdulillah, with His bounties of blessings over a period of research, I am able to complete my research paper successfully. First of all, I wish to express my deepest gratefulness to my supervisor Dr. Rosemaliza Ab. Rashid for her continuous support, worth advices and guidance throughout the process of completion for my research. Additionally, I am hugely gratitude to my respectable advisor, Assoc. Prof. Dr. Abu Bakar Hamed for his professional and untiring guidance from the beginning until the end of this research. May Allah Almighty gives reward to both of them for their kindness.

Moreover, a special appreciation is dedicated to my beloved parents Hj. Abdul Rahim Hasan and Hjh. Hamiya Abu Hasan for their endless moral and financial support, prays, loves and cares. Special thanks also go to my oldest brother and my youngest sister for their joy, happiness and encouragement. Not forgotten, infinity gratitude goes to Mohamad Azlan Abu Bakar who always cultivates a fire of success, gives an endless spirit and motivation all the way throughout the journey.

A word of thanks also is extended to all my dearest friends in sharing the information, assistance and encouragement throughout this study. Finally, I also would like to express my appreciation to all individuals who involved either directly or indirectly in this study. May Allah Almighty bless and reward the kindness of everyone.

CHAPTER ONE

INTRODUCTION

1.1 Background of the Study

Younger generation nowadays are more likely to bear financial risks in adulthood than their parents. Due to the changes in the marketplace and social welfare systems, this generations are unlikely to be able to learn from past generations and they would prefer to rely on their own knowledge (PISA, 2012). Effort to increase the financial literacy level can be severely limited by a lack of early exposure to financial education. It is therefore significant to give some insight about the necessary to enhance the financial literacy.

One of the most significant current discussions in financial literacy is due to the rising of bankruptcies' cases involving young people (Hamzah, 2013). According to Uenos (2014), the statistic revealed by Malaysian Insolvency Department (MID), indicates that nearly forty-five thousands individuals that below than thirty five-years old in this country have been declared bankrupt within the period of 2011 until 2013. On average, a total of forty-one individual declared to be bankrupt everyday due to the failure to bear the burden of debt. As stated in The Star (2010, July 19), many young adults being declared bankrupt because of failing to observe the basic rule in sound financial management.

“PSYCHOSOCIAL FACTORS AND GENDER INFLUENCING THE LEVEL OF ISLAMIC FINANCIAL LITERACY”

Dear Respondents,

This questionnaire is intended to determine the influence of psychosocial factors and gender towards the level of Islamic financial literacy. The information obtained from this questionnaire is very important for researcher to meet the research objectives in fulfilling the requirements of study for Master in Islamic Finance and Banking at Universiti Utara Malaysia. This questionnaire is addressed specifically to the Islamic finance and banking students only.

All of the information and respondents identity will be kept **STRICTLY CONFIDENTIAL** and will be used for **ACADEMIC RESEARCH PURPOSES** only. Thank you for your kind participation and cooperation towards this study.

Your Sincerely,

Siti Hafizah Binti Abdul Rahim
 Master in Islamic Finance and Banking (MIFB)
 Universiti Utara Malaysia.
