ABSTRACT

Many studies have been conducted by researchers either academia or practitioner to understand factors contributing of job performance among worker part time students in employee engagement. The present study fills the gap by examining the relationship between employee engagement and work life balance and job performance using a sample of 144 workers of part time student. Data was collected using the random survey method based on the list of name from Post Graduate School in Universiti Utara Malaysia. The four research questions and four research objectives of the study answered by performing regression analysis and four hypothesis is tested. The finding of the study there is significant positive relationship between employee engagement, job performance and work life balance. Besides, the finding of the study gives a negative relationship between work life balance and job performance. The mediating role played by job performance assisted in clarifying the underlying process that was responsible for the relationship between employee engagements in workers of part time student. Limitation and recommendation for future study were also discussed.

Keywords: Employee Engagement, Work Life Balance and Job Performance.

Kata Kunci: penglibatan pekerja, keseimbangan hidup kerja, dan prestasi kerja.
ACKNOWLEDGEMENTS

All praise due to Allah S.W.T for giving me the strength, courage and determination to complete this study.

I would like to express my sincere appreciation to the Government of Malaysia, Ministry of Higher Education for granting me a scholarship and an opportunity to complete this study.

I would also like to thank my chair of the supervisory committee Dr. Subramaniam Sri. Ramalu, for his advice, guidance, critical assessment and useful suggestions during the entire course of this study. Big Thanks to you Dr.

I would like to thank my parents, Mr. Abdullah bin Said and Mdm. Rohani Binti Yusoff for their selfless and endless support. Confucius once said, “While his parents are alive, the son may not get go abroad to a distance”. Thank you for forgiving me being further away from home and could not spend much time with you. I promise I will be back to your side when I become a person who is reliable enough to take over all these responsibilities and sorry that it takes too long. Also many thanks to my siblings, Kak Long and Abang Long, Kak Ngah and Abang Ngah, Kak Teh and Abang Teh and Adik for give the support me in any time. Also many thanks to my husband Mohamad Zamani Bin Embong for all these trust he offered. Thank you because always listen my concerns about this study.

Finally, thanks to my group members past and present, especially my roommate Nor Aliza, for making the research such a fun place to work. Thank to all my freinds Aini Wizana, Samihah, Abba and all friends for helped me get started in this lab and handed me this wonderful project give the good suggestions. I am very appreciating it.

Figure 1: Theoretical Framework on the Mediating Effect of Work Life Balance on the Relationship between Employee Engagement and Job Performance
CHAPTER 1
INTRODUCTION

1.1 Background of Study

Education is one of a major contributor to the development of human capital and economic of the country. Education could generate the creativity and innovation to serve the young people with the right skills needed to become competitive in the job market as well as being an enabler towards economic development of a country as a whole. With this regard, the government has ensured that the education system in the country to be functioned effectively in ensuring the success of the new economic model, economic transformation program and the government’s transformation programme under pinning economic growth in the global competition.

Recently, the education development in Malaysia is growing rapidly which has help in opened the minds of the community to become more competitive to pursuit the knowledge. The governments have created a variety of agendas that can attract people regardless of age to gain knowledge such as through the National Education Blueprint. The education system is the cornerstone for the development of the country where it has to provide the knowledge and skills to the people to drive the economic growth and prosperity of the country. The government is taking steps to prepare for the transformation of the education system in order to achieve this goal until 2025. Based on the initiatives that has been introduced under the National Key Result Areas, the development plan had outlines the major changes as intended. The changes covered students’ learning approaches aspects, methods of teachers and school leader’s
