ABSTRACT

This purpose of this study is to identify factors contributing towards turnover intention among the bank employee especially CIMB Bank branches. The turnover intention can be measured in the aspect of job stress, working environment, and compensation salary and career growth. The survey method was used to collect primary data through the use of questionnaire to the bank employees attached at CIMB branches in Klang valley. Around 120 questionnaires were distributed and 100 questionnaires were successfully collected from the respondents. All the data was gathered from the respondents were analyzed using Statistical Package for Social Science 16.0 versions and using the descriptive and inferential statistics. There are two types of data analysis techniques adapted at this research which is descriptive analysis and inferential analysis techniques. Descriptive analysis technique is used to identify the background of respondents in the aspect of age, gender, marital status, years of experience, current position, race and qualification. However inferential analysis is used to determine the correlation relationship between independent variables such as working environment, job stress, and compensation salary and career growth with dependent variable which is turnover intention of CIMB employees in Klang valley branches. The result of the study shows that there is a moderate correlation between working environment factor with bank employees turnover intention compared to other variables such as job stress, compensation salary and career growth. This study has played an important role to identify variables or factors contributing towards employees’ turnover intention in CIMB branches in Klang valley and also identified few steps to reduce the problem of turnover intention.

Keywords: Turnover Intention, Career Growth, Compensation, Job Stress and Environment.
ABSTRAK

Kata Kunci: Niat perolehan kerja, Pertumbuhan Kerjaya, Pampasan, Tekanan Kerja dan Persekitaran Kerja.
ACKNOWLEDGEMENT

First and foremost, I would like express my highest gratitude to GOD for the blessing, love, opportunity, health and mercy for me to complete this thesis. In this valuable chance, I personally would like to express my gratitude and appreciation to all people who have provided motivation, advice, support, and even remark that had contribute towards the completion of my project paper. My special appreciation and heartily thankful to my research supervisor, Madam Nor Pujawati BintiMd Said, for her support, insightful suggestions, and endless patience from the beginning of my project paper towards the end.

My deepest appreciation goes to my beloved parents, my mother Mdm Premvathy for the endless love, pray, and support, and my father, Maniam Thangaveloo who has become one of my inspiration. My sincere thanks also go to my lovely and caring siblings, my sister M.Shalini and M.Krishnaaveni who always motivate and inspire my study.

Lastly, I offer my regards and appreciation to all of those who supported me in any respect during the completion of the project.

May GOD always bless us.

CHAPTER ONE
INTRODUCTION

1.1 Background

According to Jha (2014) employee turnover has always been a matter of concern for all type organizations. Huge degree of employee turnover may be detrimental to both the organization as well as the employees. Jha (2014) says that turnover has an impact over the organization’s costs relating to recruitment and selection, personnel process and induction, training of new personnel and above all, loss of knowledge gained by the employee while on job. Additionally, it results in understaffing which in turn lead to decreased effectiveness and productivity of the remaining staff (Hussain and Asif, 2012). Turnover may have a negative impact on the employee as well. The individual may lose non-vested benefits and may be a victim of the “grass looks greener” phenomenon. Most often, turnover intention is consequential to actual quitting behavior (Jha, 2014). Hence, it is imperative to understand the determinants of turnover intentions so as to arrest the outflow of key personnel and retain competitive edge.
