ABSTRACT

The contemporary way of living and the economic effects has had its consequence on the way business activities today handle the motivation of employees. Hence, organizations need to determine the best way to motivate their employees. This study was conducted to examine the HR Antecedents that influence Gen Ys’ job motivation in Malaysian SMEs. Quantitative approach with self-administered questionnaire method has been employed for data collection of this study. A total number of 125 respondents based on Convenience sampling was participated in this research. The response rate is 78%. The frequency, mean and standard deviation is computed to measure the average and the variations of the results to determine the differences. A Pearson correlation test is carried out for the HR antecedents and the level of motivation of the respondents to see if there is a significant relationship between the two. Overall, this study found that Gen Ys’ in Malaysian SMEs regard Retaining practices, Training and Development initiatives and Rewards and Recognition as influential HR factors for their job motivation. There appears to be a big gap between the expectations of the Gen Ys’ and the HR antecedents inherent in Malaysian SMEs today. Based on the findings of this study, further research is needed to determine SMEs HR practices which effectively motivate Gen Ys’. These studies recommend to modify HR practices so that SMEs can produce a highly motivated workforce and achieve enhanced organization performance through the strategic management of their Gen Y employees.

Keywords : Human Resource Practices, Generation Y, Motivation, Small and Medium Enterprises (SMEs).

ACKNOWLEDGEMENTS

This learning experience has been a very challenging yet fulfilling one indeed. There were times I feared that I may not be able to succeed but with the unconditional support of many special individuals, I have managed to pull through and accomplish my goals. Hence, I would like to take this opportunity to express my sincerest appreciation to those who has earnestly helped through my MSc journey.

First and foremost, I would like to thank my dearest husband, Mr. Devandran for being nothing but caring and understanding all these years. You have always believed in me and never given up on me no matter how tough things get. I would not have been able to get this far without your love and support.

Next, I would like to thank my supervisor, Pn. Nor Pujawati Binti Md Said for her patience and guidance along the course of my MSc Management project. I am truly blessed for having such a passionate and dedicated supervisor to guide me in the course of this study. The Universiti Utara Malaysia, its professors/lecturers, the administrative personnel and my fellow classmates played a very important part in all of this as well.

Last but not least, I would like to thank all my other family members, friends and colleagues who kept me going until the very end. You all mean the world to me. Thank you very much.

August 2014,
Puganiswari Magespran

CHAPTER 1
INTRODUCTION

1.1 Background of the Study

Today’s workforce is more diverse than it has ever been in history as it comprises of three primary cohort groups; the Baby Boomers, the Generation X (Gen Xs’) and the most recent entrant to the labor market; the Generation Y (hereafter referred to as Gen Ys’) (Eisner, 2005; Glass, 2007). Born between 1980 and 2000, Gen Ys’ are said to be the next largest cohort group after the Baby Boomers (Zemke, et al., 2000). For that reason, their power of influence on the society and the workplace is considerably large (Allen, 2004; Howe and Strauss, 2000). Gen Ys’ are the children of the overprotective Baby Boomers that were brought up in times of economic growth, globalization and violence (Eisner, 2005; Glass, 2007; Martin and Tulgan, 2006). Due to their exposure to globalization, they have become the most ethnically diverse generation to date (Eisner, 2005; Zemke, et al., 2000).

Chester (2002) believes that Internet and Communications Technology (ICT) is the primary differentiating factor that sets the Gen Ys’ apart from the rest. They are indeed the most tech-savvy generation since they grew up in the ICT era where computers were as common as a television (Gorman, et al., 2004; Martin and Tulgan, 2001; Zemke, et al., 2000). Statistics from a New York-based market-research company named IDC/Link Resources Corporation showed that 60% of all households with children aged 7 years and below owns computers (Zemke, et al., 2000). Another survey conducted by PricewaterhouseCoopers on their Gen Y employees in Malaysia revealed that all their respondents own at least one email account and 90% were registered with at least two or more email accounts (PricewaterhouseCoopers, 2009).

As a result of Gen Ys’ upbringing, it is found that they possess very distinct characteristics compared to the generations before them (Caudron, 1997; Eisner, 2005; Glass, 2007; Meier and Crocker, 2010; Weyland 2011). They are alleged to be remarkably talented, creative, optimistic, confident, ambitious and eager to succeed (Eisner, 2005; Glass, 2007; Martin and Tulgan, 2001; Meier and Crocker, 2010; Zemke, et al., 2000). Conversely, they can also appear to be rude, impatient, easily bored and
