CHAPTER 1

INTRODUCTION

1.1 Chapter Outline

The Small and Medium Enterprises ('SMEs') continues to demonstrate its economic importance to the country. In year 2012, 97.3 per cent of the companies in operation in the country are SMEs. Acknowledging the importance of SMEs to the economic growth as well as its contribution in creating job opportunities to the people, a series of SMEs development programmes were organised annually to provide training and to enhance necessary skills in order to expand and grow the businesses. Besides, the ease of financing access also allows SMEs to exploit this advantage to ensure continuity of the business. (Kee, Effendi, Talib and Rani, 2011 and the SME Economic Census 2013)

The stable increases in SMEs never stop the increase in workplace accidents over the years. Since year 2008, the number of workplace accidents has never slowed down; an escalating trend in workplace accidents could be witnessed over the years from 54,988 workplace accidents in 2008 to 60,590 workplace accidents in 2012. Such high number of workplace accidents could not be

REFERENCES

Dear Respondent,

Appreciate if you could spend some time to complete this survey. This survey is part of my research on "Workplace Accidents among SMEs in Malaysia". This study is written with the aim to examine the reasons the high number of workplace accidents recorded in the SMEs in Malaysia if compared to a relatively lower number of workplace accidents reported by other developed countries. This study would be beneficial for the government to reassess the current organizational safety and health policy and procedures for businesses in Malaysia and make amendments as necessary to ensure that the acts or amendments that govern businesses in Malaysia in terms of
operational safety and health, are up to date. After knowing the causes to the escalating trend in number of workplace accidents, solutions could then be proposed to adhere to the worrying situation.

All information provided will be kept anonymous and strictly confidential and will only be used for the purpose of this academic research.

Thank you.

With best regards,

Nadia Bt Mohd Azam Na’ir
