ABSTRACT

Tourism sector is an important sector that many countries are focusing on the development of tourism sector. There are many studies show there is a significant relationship between tourism sector and economic growth. The objective of this study is to see how significant the tourism sector extension would give impact on the Malaysia GDP and other macroeconomics aspects. The method used in this study is input output analysis. Using Malaysia input output table 2010, the 124 commodities were aggregated into main sectors in Malaysia and disaggregate the tourism sector. After that, the technical coefficient were calculate to the see the direct requirement of input needed by the sector to produce outputs. Then the multiplier effect which is the output multiplier and export of tourism sector multiplier and also the backward and forward linkages between tourism and non-tourism sectors in Malaysia. The multipliers shows that the tourism sector contributes to Malaysia economic by generating output and the export of tourism sector. Besides that, the interlinkages between sectors shows that there are strong linkages between tourism sectors with other sectors. It creates the demand and supply of outputs that can stimulates the economy.
ABSTRAK

ACKNOWLEDGEMENT

First and foremost, my humble gratitude and appreciation to God, for enabling me proceed with this Project Paper work until its final form.

I am greatly indebted to my supervisor, Dr Mukaramah binti Harun who has made a significant contribution until the completion of this research and deserves special thanks for her kindness, patient, generosity and guidance when supervising my work.

My thanks also to my examiner, Dr .................................................................
for his/her support in order to make this research more meaningful.

Finally, special respects and thanks to my beloved father, Mr. Ravindran Kannan who inspires me to succeed now and hereafter. My special respects and thanks also goes to my mother, Mrs. Murugasevary Raman for her unconditional love and encouragement, and for my family and friends for being supportive throughout my study at University Utara Malaysia.

Last but not least, I am grateful to God for giving me faith, will and strength to complete my study.

Thank you.

CHAPTER 1
INTRODUCTION

1.1 Introduction

For past six decades, international tourism have shown a huge development and also experiencing continued diversification. Experiencing continued expansion tourism is becoming one of the largest and significantly growing economic sector. International tourist arrivals grew by 5% in 2013 which is 1087 million arrival worldwide. This shows an increment from year 2012 with 1035 million arrival million (UNWTO, 2014). Tourism industry which already growing since ancient time found successful in generating income of a countries. Number of tourist destination are growing bigger and bigger. According to Khaleed (2009), tourism is one of the method to overcome macroeconomic problems. By focusing in tourism sector brings promising benefits to the country as it is one of the tool to generators of income and employment creation. Tourism based development plays a vital pivotal role in contributing to its GDP growth both in developed and developing countries.

Nowadays many countries focusing on tourism sector as a tool to develop their countries in term of many facets. Countries mainly developing countries are promoting and sustaining a world class tourism to generate economic growth. Developing countries are trying to enact policies to improve their tourism industry as a tool to develop their foreign exchange earnings. Malaysia are never left out in promoting their tourism in many ways. According to Elsadig and Abdur (2011) said that Malaysia is becoming of the leading tourist destination competing with other
