ABSTRACT

Tax evasion is a serious problem that causes government of different nations lose revenues at various levels. The main aim of this study is to determine the factors influencing tax evasion among taxpayers from the Nigerian perspective. In order to achieve this goal, the study employed a survey method, where Gombe State taxpayers had been the scope and selected respondents of this study. A self-administered questionnaire was deployed as a method of data collection. The total number of the state taxpayers was 26,313, out of which 379 were randomly selected as the sample size. Multiple regression analysis was used in analyzing the data collected to determine the correlation between the variables. The finding of the study indicates that, the tax system, income level and education level have significant positive relationship with tax evasion. On the other hand, tax rate and corruption indicates positive relationship but are not significantly correlated with tax evasion. Therefore, the study recommends that government should improve the tax system through amending and adjusting tax laws and policies that would encourage people to comply voluntarily. Similarly, enhancing the tax education will also improve the compliance behavior. Finally, the study suggests that proper check and balance method and effective tax reform will yield more compliance at different level.

Key words: tax evasion, determinants, taxpayer, Nigeria.

ACKNOWLEDGEMENT

Bismillahir Rahmanir Rahim. All praise and gratitude be to Him (Allah), the exalted and peace be upon His noble prophet and (apostle and his household) to those who follow their right paths till the day of resurrection. After all, once again, I am so much grateful to Allah who grants me opportunity, patience, ability, wisdom and strength to finish this thesis with success. I am also grateful to Universiti Utara Malaysia for giving me an opportunity to further my academic dream in its highest elevation in an eminent management Universiti. I am proud to be a UUM Alumni.

Furthermore, my special indebtedness goes to my humble, helpful, dedicating, caring and elegant supervisor Dr. Muzainah binti Mansor for her thoughtful guidance, patience and marvelous suggestion throughout the period of the research. May Allah reward her abundantly and continue guiding her for future endeavors.

In addition, I would like to extend my special and profound appreciation to my brother Dr. Umaru Gurama (Idayan Yamaltu) for his encouragement and support both intellectually and financially that without him this goal might not be achieved. May Allah grant him abundance and endless reward. Moreover, my appreciation goes to my Parents, Prof. M.G. Dukku, Alh. Adamu Gurama and Dr. Ahmed Maiyaki, relatives and friends for always encouraging and supporting me. Also, to my colleagues at UUM Abdurrahman Pantamee, Musa Shehu, Tasiu kademi, Awaisu Adamu and friends Nasiru Musa, Abubakar, Halilu, Madauci to mention a few. May Allah reward all of you.

I would not end this appreciation without acknowledging my sister (Wife) Saadatu Ahmed (Goggoyya) for her patience, understanding and dedication for living away from my company. I am grateful for the concern you show throughout my studies may Allah continues to strengthen our relationship forever. Also to our kids Khadijatu (Dija) and Muhammad (Masduq) zada kumullahu imanan wa jama’ana fil khair da iman wa Abadan.

Finally, I am so thankful to Gombe State University for granting me the chance to pursue this higher degree of leaning, and also to our able registrar Alhaji Yuguda M. Abdullahi, once again I am grateful so much.
DEDICATION

CHAPTER ONE

INTRODUCTION

1.1 Background of the Study

Taxes are said to be an immensely vital instrument and primary source of revenues to the government. Revenues which are needed to finance critical programs (e.g. health care, education), services (e.g law enforcement, public utilities), and infrastructures (e.g. road construction, environmental protection) which are beneficial to the society. Worlu and Emeka (2012) assert that tax revenue utilization is a basis for supporting developmental activities in less developed economies. However, collecting revenue has been a difficult matter primarily due to various form of confrontation such as tax evasion and corruption exercises. Taxes provide government with revenue, and those who contribute have a say in the system, about how the government spends their monies. Moreover, taxes are an essential component to economic growth and social growth therefore. Hence, there is no hesitation about the need for and benefit of taxation (Oyedele, 2012).

The disbursement of taxes is a public responsibility and it is an imposed contribution by government on citizen and corporate entities to enable the running and financing of public utilities and other social needs of the nation. The desire to uplift one’s society is the first aspiration of every patriotic citizen (Adebisi & Gbegi, 2013). Whenever a country’s taxation system failed to establish appropriate policies to collect tax, many individuals will use this opportunity to evade paying taxes. Thus, tax evasion will occur
