PERMISSION TO USE

In presenting this thesis in partial fulfillment for a post graduate degree from the Universiti Utara Malaysia, I agree that University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes, may be granted by my supervisor or, in her absence, by the Dean of Research and Postgraduate Studies, College of Business. Any financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part should be address to:

Dean of Research and Postgraduate Studies

ABSTRACT

Funds from banks play an important role in the growth and maintenance of a firm. Hence, it is important that a firm creates and maintains a good relationship with its bank in order to secure the funds. Establishing a good bank-firm relationship can also help to reduce conflicts between shareholders and creditors since close bank relationship helps the firm to get funding from other financial institutions. Relationships between a bank and a firm consist of two types: bank-borrower relationship and consumer-supplier relationship. The bank-borrower relationship involves primarily a loan agreement between two interested parties. Cooperation between a bank and a firm is more durable than customer-supplier relationships in terms of provision of financing. This thesis investigates the effect of banking relationships on firm performance on companies in Malaysian capital market. Seventy eight firms from the Top 100 public-listed companies in Bursa Malaysia are examined. Investigation is performed to show the effects of number of banking relationships, short-term financing, long-term financing, firm size, and foreign ownership on the firms’ performance as measured by return on assets (ROA), return on equity (ROE), and Tobin’s Q. Findings show a significant and negative relationships on the number of bank relationships for all of firm performance measures, consistent with previous studies. For ROA measurement, result shows a significant positive relationship with short-term financing, a finding also consistent with past studies. Short-term loan and long-term loan impact ROA and ROE positively, while affecting negatively firm performance measured by Tobin’s Q. ROA and ROE have a positive correlation with foreign ownership, while Tobin’s Q is negatively correlated with foreign ownership. In general, the study contributes to banking literature by investigating and evaluating the relationship of firm performance and lending banks in shareholders’ perspectives.
ACKNOWLEDGEMENT

All praise to Allah S.W.T., the Lord of Universe. Blessing and peace be upon our prophet Muhammad S.A.W for giving guidance, courage and spirit to us in order to complete this thesis.

This thesis was written during the fourth semester of 2014/2015 at Universiti Utara Malaysia in fulfillment of the Master Program in Science Management. Many people have helped me with the completion of this study and make the work possible.

I would like to express my sincere gratitude to my supervisor Associate Professor Norafifah Ahmad for her advice, guidance, support, patient, knowledge and encouragement throughout the completion of my thesis. I extend my special gratitude to all my post-graduate lecturers, and my great appreciation for their exciting classes. I also would like to acknowledge the kind assistance of staff from the library and main Office of COB for their help.

I would like to express me special thanks to my family for their support and encouragement throughout my life, my friends, as well as my classmates, not forgetting those who have contributed to my life especially my family and my friends.

Thank you for your support. Only Allah can repay all your help and kindness.

CHAPTER ONE: BACKGROUND OF STUDY

1.1 Introduction to Study                     1
1.2 Problem Statement                         5
1.3 Bank-Firm Relationship                    6
1.4 Research Questions                        9
1.5 Research Objectives                       10
1.6 Significance of the Study                 11
1.7 Organization of Remaining Chapter         11

CHAPTER TWO: LITERATURE REVIEW

2.1 Introduction to the Study                 13
2.2 Bank-firm Relationship                    13
2.3 Firms’ Performance                        14
2.4 Banking Relationship                      15
2.5 Credit Financing Relation                 18
2.6 Firm Size                                 21
CHAPTER THREE: METHODOLOGY

3.1 Introduction 42
3.2 Theoretical Framework 42
3.3 Hypothesis Development 43
3.4 Data Collection 44
   3.4.1 Sample Selection 44
   3.4.2 Ordinary Least Square Regression and Model Specification 45
      3.4.2.1 Model Specification 46
3.5 Research Model and Measurement of Variables 47
   3.5.1 Dependent Variables 47
   3.5.2 Independent Variables 48

CHAPTER FOUR: RESULTS AND FINDINGS

4.1 Introduction 52
4.2 Descriptive Analysis 52
   4.2.1 Sector Classification 53
   4.2.2 Number of Bank Relationships 53
CHAPTER FIVE: SUMMARY AND CONCLUSION

5.1 Introduction 67
5.2 Summary of General Findings 67
5.3 Limitations of the Study 69
5.4 Recommendations for Firms 70
5.5 Recommendations for Future Research 72
5.6 Conclusion 73

Chapter 1
Introduction

1.1 Introduction to Study

As the business world today becomes more competitive and challenging, firms must have good management in order to improve their performance and sustain it. The management includes the board of directors as a resource provider because they provide social and business contacts, and influence the environment in favor of the firms (Carpenter and Westphal, 2001). It is also believed that managers have the capability as a resource to provide connections to other business sectors and also to the external environment (Zahra and Pearce, 1989). However, there is a separation between management and owners, where the managers tend to act with self-interest that are not always in the best interest of the owners (Jensen and Meckling, 1976).

In order to avoid any irresponsible and unethical acts, the regulatory bodies and shareholders are required to impose a monitoring and control process via corporate governance code to control risks. Corporate governance generally refers to the mechanisms, processes and relations by which firms are controlled and directed. It identifies the rights and responsibilities among different participants in the corporation (such as the board of directors, managers, shareholders, creditors, auditors, regulators, and other stakeholders) and includes the rules and procedures for making decisions in corporate affairs. Corporate governance
