Thesis Submitted to

Othman Yeop Abdullah Graduate School of Business,

Universiti Utara Malaysia,

In Fulfilment of the Requirements for the Degree of Master of Human Resource Management
Saya, mengaku bertandatangan, memperakukan bahawa
(I, the undersigned, certified that)
UGHEOKE SOLOMON OZEMOYAH (811123)

Calon untuk Ijazah Sarjana
(Candidate for the degree of)
MASTER OF HUMAN RESOURCE MANAGEMENT

telah mengemukakan kertas projek yang bertajuk
(has presented his/her project paper of the following title)

STRATEGIC HUMAN RESOURCE MANAGEMENT AND FIRM PERFORMANCE IN FOOD AND BEVERAGE: SME IN LAGOS, NIGERIA

Seperti yang tercatat di muka surat tajuk dan kuit kertas projek
(as it appears on the title page and front cover of the project paper)

Bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi bidang ilmu dengan memuaskan,
(that the project paper acceptable in the form and content and that a satisfactory knowledge of the field is covered by the project paper).

ABSTRACT

SMEs are the most important source of economic growth and key ingredient in promoting private sector development in Nigeria. The need for the entrepreneur in venturing into SME is the creation of employment not only to their immediate family members but to contribute to the overall economic development of the society. Therefore, the objective of this study is to examine the relationship between strategic Human Resource management practices and firm performance in food and beverage SMEs in Lagos, Nigeria. Only SMEs in Lagos whose employees are full time staff of the firms and have been in business for a period not less than two years before conducting this study were involved in this study. Due to this, a cross sectional questionnaire survey research design was conducted in this regard. Data were generated from 163 SMEs comprising food and beverages SMEs in Lagos, Nigeria. A number of analyses were conducted using SPSS version 19 to analyze the data collected. The findings from the hypothesis tested indicate that there is a significant relationship between SHRM Dimensions (work skills, work knowledge, knowledge sharing, incentive for achieving firm goals, incentive for employee contribution, team cooperation, individual contribution, job fit, and individual fit) and firm performance (intangible and tangible). Thus the study recommends that work skills and individual fit mostly influence intangible firm performance while work skills and job fit are the most significant factor that enhance tangible performance. Finally, both the theoretical and managerial implications are presented and the limitations of this study.

Keywords: SMEs, Firm performance, SHRM.

ACKNOWLEDGEMENTS

I am very grateful to God almighty for his protection and grace bestowed upon me to successfully complete my Master's degree in the university Utara Malaysia. To my supervisor, DR. MOHD FAIZAL MOHD ISA, I say a very big thank you sir for being very supportive and kind to me. Your encouragement, inspiration, understanding, tolerant advice actually solidified my resolve to completing this study, indeed you would never be forgotten in my mind.

Space will not permit me to thank all, let me note and sincerely thank my uncle Dr. Benjamin Ugheoke his initiative and financial support, in seeing me through this process. To my wonderful confidence Mr. Steve Ugheoke who never turn back to me in the course of actualizing my dream, I thank you for encouraging and bequeathing your trust on my ability. To my parents Mr. and Mrs. P. I. K Ugheoke for your prayers and support.

And finally, I would like to thank all my friends and well-wishers who in one way or the other positively impacted the success of my program.

CHAPTER 1
INTRODUCTION

1.0 INTRODUCTION

Performance is the behaviour or the task that the employee does in the workplace, not about the outcome of their work (Aguinis, 2007). However, Khandekar and Sharma (2005), define firm performance as the result that specifies or replicates the firm efficiencies or inefficiencies in terms of corporate image, skills and financial performance. Wright and Snell (1998), also define firm performance as a planned human resource operation and activities to facilitate firm’s achievement of goals and objective. Therefore, the growth and survival of any organization is subject to its important SHRM practices on organizational objectives, ensuring that the right employee is recruited at the appropriate time and at the accurate place. SHRM is acquainted with the task in ensuring firms competitiveness and identify the important practical area that will enhance firm performance (Teeratansirikool, 2013). It is essential for firm to evaluate their human resource strategies and practices if they desire to increase output and maintain a viable workforce that will enhance the chances of their firm’s achievement.

Doing this require performance measures that will enables supervisor, managers to assess if established goals have been accomplished (Aguinis, 2007). It strengthens the signals that direct supervisors, and manager’s consciousness to the major strategic path that leads to firm performance (Teeratansirikool, 2013). Performance measures facilitate the
