ABSTRACT

This study evaluated on employee safety perception at a paper manufacturing company with emphasize on relationship between safety climate and safety performance among employees in a paper manufacturing company in Pahang. This study examined the relationship between safety climate and safety performance in order to understand safety perception that has been practiced in Pascorp Paper Industries Berhad. Safety is utmost issue, however employer and employees does not feel it as an important process of long goal safety. Understanding the concept of workers safety will enhance employer understanding the safety requirement of Pascorp Paper and adhere legal requirements. The study found that factors influencing the success of the safety system are safety climate and safety performance in reducing occupational incidents. Using SPSS 19 to measure the result of studies and test of hypothesis perceived safety climate to achieve the safety performance in organization. The study noticed that there is no significant relationship between gender age and year of service status. While significant relationship between workers position, education level and safety performance.

Keywords: Safety Perception, Safety Climate, Safety Performance
ACKNOWLEDGEMENT

I would like to express my sincere appreciation to my supervisor, En. En Lukman Bin Wan Mat Daud for his encouragement, guidance, critics, friendship and help during the development of this project report. I am especially grateful for his assistance in providing me with ample reference materials at the early stage of this study.

I would also like to express my gratitude and thanks to my wife, Ms. Suhana Binti Halim, for her constant encouragement and advice. This project paper would not have been possible without her love and support.

A special thanks to my daughters my daughter Nur Syuhada, Nur Syafura and Nur Syakina, who was always with me at the computer and when I was studying. Your soft purring and desire to be close was a welcome distraction when I needed a break and a comfort to know how unconditionally important you thought I was!

A special dedication to my late father, Haji Hussain bin Mahdi who had provided me with the fundamentals to excel academically and in my profession.

Lastly, my sincere appreciation also extends to all my colleagues and others who have provided assistance at various occasions. Their views and tips are useful indeed. Unfortunately, it is not possible to list all of them in this limited space.

Thanks to all for helping me either directly or indirectly in the completion of this project paper.

CHAPTER 1
INTRODUCTION

1.0. Introduction

This study will explain the detail overview of the study on relationship between safety climate and safety performance in the Pascorp Paper Industries Berhad. In this chapter will include an explanation about the research background, area research, safety practices in Pascorp Paper, problem statement, objective and research question for this study.

Occupational Safety and Health Act (OSHA, 1994) set an objective to promote safe and health workplace for every person at work, which adapted their physiological and psychological needs. Organization started giving attention to organizational and management impact on safety performance particularly the function of safety climate (Nahrgang, Morgesan & Hofmann, 2007)

This study on safety perception is paramount, Wong due to measure the level of safety practices in the organization. Studies show that positive safety climate in the organization will result in reducing the accident rate in the company (Huang, 2006, Wong, 2009, Susan et al., 2008, Tsung, 2007). Thus management commitment and involvement of employee’s participation as well as total quality management have been highlighted as key elements of success in the safety system (Ahamadon Bakri et al., 2006, Huang, 2006, Chia Yang et al., 2009).
The contents of the thesis is for internal user only
