PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of Research and Post Graduate Studies. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

**Dean of Research and Post Graduate Studies

ABSTRACT

Nowadays mobile applications became a widely used in our world, it has many features rather than the traditional desktop and web applications, and it provides many services in a simple way so the user can do many things through his mobile device.

UUM receives every year many international students who face a problem in room reservation inside the university at Bank Rakyat , there are many suggestions to solve this problem , one of these solutions is to implement a system that allows the student to view full information about the accommodation inside the university and booking or browsing a room through the mobile device from his country or before arrives to the university , so the international students will know where they will stay before arriving , and they will not be attempt to seek an accommodation after arriving.

ACKNOWLEDGEMENT

First, I would like to express my appreciation to Allah, the Most Merciful and the Most Compassionate who has granted me the ability and willing to start and complete this study. I do pray to His Greatness to inspire and enable me to continue the work for the benefits of humanity.

My most profound thank fulness goes to my supervisor **Miss Nor Farzana Binti Abd Ghani** for the patient guidance, encouragement, understanding, and excellent advice throughout this study. She has been the center of inspiration and guidance. I am grateful and deeply thank her for her support and cooperation; my thanks also go to all the lecturers epically **Assoc.Prof Dr.Wan Rosaini Sheik Osman** who helped me to collect my data during their classes. "May Allah bless all of them".

I am deeply and forever indebted to the people in my life that touched my heart and gave me strength to move forward to something better. I wish to thank all my dearest family members, especially my Father, my Mother, and my lovely Brothers and Sisters. I dedicate my admiration and thanks to all of them who have sacrificed and supported me to the completion of the thesis.

CHAPTER ONE

STATEMENT OF OBJECTIVE

1.0 Introduction

Today the people have many choices of computing devices such as PCs, laptop, PDAs, Tablet PCs, Smart phones, Pocket PCs etc. Also a great variety of operating system choices are available for these devices and all of these systems require software to be developed for performing various tasks. The students who want to study in UUM they are facing big problem to find a room inside the university especially the international students because they cannot booking room before they reach UUM.

There are many colleges inside university UUM like Bank Rakyat Residential (BRR) college and Maybank college, these colleges receive every semester many international student's, the researcher found that the BRR facing more problem than the other colleges because the following problems (food, internet, sharing room, very far).
