Kedah Darul Aman
ABSTRACT

This study evaluated the effects of time management behavior, job demand, job resources towards Burnout. A review of the academic staff in the district to the north, Malaysia is also assessing the burnout experienced by workers in the academic fields. Respondents were 157 academic staff includes lecturers around northern Malaysia, UUM, UiTM Merbok, UniMAP and USM. The data collected were processed collectively using the Statistical Packages for Social Science (SPSS ver.20). The data were collected through the use of questionnaires and online form. Statistical techniques used were the percentages, cross tabulation, correlation, and multiple regression analysis for finding answers to research questions that formed. All three hypotheses were accepted that the value of multiple regression showed JD, JR and TMB significantly to burnout at levels not exceed 0.05. Multiple regression results also show that all these variables significantly to burnout and explain 33.6% ($r^2 = 0.336$, $F = 25,823$, $p \leq 0.05$) total variance.

The study also found that university management should take proactive steps to meet the demands of jobs and job resources, encourage employee time management behavior is observed mainly ensure that burnout does not happen in the workplace. Thus, the organization can give recognition to employees when they apply new knowledge in the workplace, provide financial resources for development and growth promoting employee participation in providing activities in the organization.

Keywords: Burnout, Time Management Behavior, Job Demand, Job Resources
ABSTRAK

Kajian ini menilai kesan-kesan tingkah laku pengurusan masa, permintaan kerja, sumber-sumber kerja terhadap Burnout. Kajian dalam kalangan staf akademik di sekitar daerah utara, Malaysia ini juga menilai tahap burnout yang dialami oleh para pekerja dalam golongan akademik ini. Responden terdiri daripada 157 staf akademik meliputi pensyarah-pensyarah di sekitar utara Malaysia iaitu, UUM, UiTM Merbok, UniMAP dan juga USM. Data yang dikumpulkan telah diproses secara kolektif dengan menggunakan Statistical Packages for Social Science (SPSS ver.20). Data-data yang telah dikumpul melalui penggunaan borang soal selidik dan borang atas tarian (online form). Teknik statistik yang digunakan pula adalah secara pemeratusan, jadual silang, korelasi Pearson, dan analisis regrasi pelbagai bagi mencari jawapan untuk setiap persoalan kajian yang dibentuk. Ketiga-tiga hipotesis diterima di mana nilai regrasi pelbagai menunjukkan JD, JR dan TMB signifikan terhadap burnout pada aras tidak melebihi 0.05. Keputusan regrasi pelbagai juga menunjukkan bahawa kesemua pembolehubah ini signifikan terhadap burnout dan menjelaskan 33.6% ($r^2 = 0.336$, $F = 25.823$, $p \leq 0.05$) jumlah varians.

Implikasi kajian mendapati pengurusan universiti perlu mengambil tindakan proaktif untuk memenuhi permintaan pekerjaan dan sumber pekerjaan pekerja, menggalakkan tingkah laku pengurusan masa pekerja diperhatikan terutama memastikan burnout yang tidak berlaku di tempat kerja. Oleh itu, organisasi boleh memberi pengiktirafan kepada pekerja apabila mereka menggunakan pengetahuan baru di tempat kerja, menyediakan sumber-sumber kewangan untuk pembangunan pertumbuhan dan menggalakkan penyertaan pekerja dalam menyediakan aktiviti dalam organisasi.

Kata kunci: Burnout, Tingkah laku Pengurusan Masa, Permintaan Kerja, Sumber-sumber kerja.
ACKNOWLEDGEMENT

All praise be to Allah, for His mercy in giving me the health, patience, strength and courage to complete this study and overcome every challenge in my learning pathway. I am humbled to thank many people that helped to make this study possible, firstly, I would like to express my special appreciation, respect, and thanks to my project paper supervisor, Dr. Johanim Johari who is always there to give her advice, guidance, encouragement and sharing generous amount of time throughout the process of completing this study also for her expert statistical perspective and insights.

I deeply appreciate my mom, Siti Faridah Johan, my siblings for their endless love, support and believe in me.

A great appreciation to my friends; Noraini Mohamad, Nur Asilah Mohd Taib, Zati Iwani Zulkarnain, Izzati Firdiana Kamarol Bahrain, and Nurul Fidtriayah Malek who gives meticulous support, ideas and friendship to complete my study in Master of Human Resource Management.

Special thanks to my best friends, Nur Izzati Yusra Yusof and Erma Amalina Mohd Noor, who always gives encouraged during my master's studies.

Finally, may Allah bless and reward all of you who had made this work a success and may it be accepted as our Act of Obedience to Him.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

This chapter briefly explains about the background of education system at large, Malaysian higher education system and the effects of time management behavior and job demand, job resources on burnout that happen among academic staff. This study conducted to identify the causes of burnout among this type of educators in order to achieve Ministry of Education future’s plans and strategies. Besides that this chapter also highlights the problem statement of the study, research questions, and research objectives, significance of the study, definition of key terms, scope and limitation and lastly the conclusion of the chapter research study.

1.2 Background of The Study

Education is the process to facilitating learning. It involve of knowledge, skills, values, beliefs and habits of a group of people which are transferring to other people and research. Education in large as we know easily formally divided into several stages such as preschool, primary school, secondary school. After that it will turning to higher education systems like college and university.
