PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or in their absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made or any material from my thesis.

Requests for permission to copy or to make other use of material in this thesis in whole or in part, should be addressed to:

Dean of Graduate School,
Universiti Utara Malaysia
06010 UUM Sintok
Kedah Darul Aman
ABSTRAK

Perkhidmatan kejururawatan memainkan peranan yang penting bagi memastikan pesakit dapat menikmati rawatan yang berkualiti. Kajian ini bertujuan untuk mengenalpasti tahap kualiti perkhidmatan kejururawatan di Hospital Kota Bharu (HKB). Doktor-doktor yang berkhidmat di HKB telah diminta menilai tahap kualiti jururawat-jururawat di HKB dari segi beberapa aspek kemahiran kejururawatan. Seramai 50 orang doktor telah mengambil bahagian dalam kajian ini. Kemahiran kejururawatan dinilai dari beberapa aspek seperti kebolehan, kemahiran kejururawatan, ilmu kejururawatan, kebolehan bekerjasama dengan anggota-anggota yang lain dan juga kebolehan dalam mengurus keadaan yang tertekan. Sebuah Jawatankuasa ‘Expert’ yang dianggotai oleh beberapa pakar perunding kanan juga ditubuhkan dengan tujuan menetapkan tahap kemahiran yang sepatutnya dicapai oleh jururawat-jururawat di HKB supaya perkhidmatan kejururawatan yang berkualiti dapat disediakan. Analisa maklumat yang diperolehi hasil daripada kajian ini menunjukkan bahawa tahap kemahiran jururawat-jururawat di HKB pada keseluruhan turut menunjukkan sebanyak 20% berbanding dengan tahap yang telah ditetapkan oleh Jawatankuasa ‘Expert’. Tahap kekurangan yang paling tinggi di kenalpasti bagi kemahiran kejururawatan ialah sebanyak 23% berbanding dengan tahap yang ditetapkan. Kekurangan lain juga dikenalpasti bagi ilmu kejururawatan (22%), kebolehan (21%), pengurusan anggota (18%) dan pengurusan keadaan yang tertekan (14.5%). Maklumat yang diperolehi hasil daripada kajian ini boleh digunakan untuk merancang dan menilai tindakan pemulihan ke arah peningkatan kualiti perkhidmatan kejururawatan di HKB.
ABSTRACT

Nursing is a core component of patient care. The quality of nursing provided has a significant impact on the outcome of patient care. This study was conducted with the objective of determining the current level of performance and competency of nurses in Hospital Kota Bharu (HKB). Doctors in HKB were asked to assess the level of performance of nurses in HKB. 50 doctors participated in the study. Data was collected through self administered questionnaires. An expert committee of consultants determined the level of performance that was required to ensure quality nursing. The results of the assessment by the doctors was compared with the level of performance required by the expert committee. The competencies assessed were grouped under those relating to personal capability, nursing knowledge, skills, ability to manage relationships and stressful situations. The overall job performance of nurses in HKB was assessed to be 20% below requirement. The nurses were assessed to be best in managing stressful situations with a 14.5% gap between required and assessed performance. They received lowest scores with competencies related to skills – with a gap of 23%. Competencies related to knowledge, personal capability and relationships had shortfalls of 22%, 21d%, and 18% respectively. The study gave information that could assist in planning interventions to improve nursing in HKB and other government hospitals. The results also provided baseline information that could be used in the future to assess the effectiveness of remedial measures taken.
ACKNOWLEDGEMENT

I would like to take the opportunity to thank the following who provided guidance and support throughout the course of this study.

- Professor Dr. Zakaria Ismail, School of Management, Universiti Utara Malaysia.
- Professor Dr. Juhary bin Hj. Ali, Dekan Sekolah Siswazah, Universiti Utara Malaysia.
- Prof. Madya Dr. Zabidi Azhar Mohd. Hussin, Dekan, Pusat Pengajian Sains Perubatan, Universiti Sains Malaysia.
- Prof. Madya Dr. Syed Hatim Noor, Ketua Unit Biostatistik dan Methodologi Penyelidikan, Pusat Pengajian Sains, Universiti Sains Malaysia.
- Puan Hjh. Noor Majidah bt Wallad, Timbalan Pengarah Pengurusan Hospital Kota Bharu.
- Matron Eishah Ahmad, Chief Matron, Hospital Kota Bharu.

and

All the Consultants, Doctors and Staff of Hospital Kota Bharu who participated in this study.

## CHAPTER ONE: INTRODUCTION

1.1 Background                                    | 1    |
1.2 The Nursing Function                          | 1    |
1.3 Concern over Quality of Nursing               | 6    |
1.4 Problem Statement                             | 8    |
1.5 Objective of the Study                        | 9    |
1.5.1 General Objective                          | 9    |
1.5.2 Specific Objectives                        | 10   |
1.6 Significance of the Study                     | 10   |
1.7 Limitations of the Study                      | 11   |
CHAPTER TWO: BACKGROUND OF HOSPITAL KOTA BHARU

2.1 Background

2.2 Vision Statement

2.3 Mission Statement

2.4 Goal

2.5 Strategy

2.6 Services

2.6.1 Specialist Services

2.6.2 Support Services

2.7 Nursing Services

2.7.1 Nursing Distribution

2.7.2 Post Basic Training for Nurses

2.7.3 Distance Learning Programs

2.7.4 Assessment of Nurses

2.7.5 Nursing Environment
CHAPTER THREE: LITERATURE REVIEW

3.1 Introduction 26
3.2 Assessing Competency in Professionals 26
3.3 Assessing Competency in Nurses 28
3.4 Nursing Competencies 29
   3.4.1 Knowledge 31
   3.4.2 Communication skills 32
   3.4.3 Counseling skills 33
   3.4.4 Relationship Skills 34
   3.4.5 Teamworking skills 34

CHAPTER FOUR: METHODOLOGY

4.1 Introduction 36
4.2 Study Design 36
4.3 Sampling Process 37
4.4 Data Collection 38
4.5 Development of the Research Instrument 39
4.6 Instrument Administration 42
4.7 Expert Opinion 42
4.8 Data Analysis 44

vii
CHAPTER FIVE : RESULTS AND ANALYSIS

5.1 Introduction 45
5.2 Overall Nursing Performance in HKB 46
5.3 Expert Committee’s Requirement for Nursing Performance 47
5.4 Analysis of Overall Competency and Performance of Nurses in HKB 50
5.5 Comparison of Expert Committee Requirement and Assessed Performance of Nurses in HKB 51
5.6 Comparison of ‘Required Competencies’ and ‘Assessed Competencies’ of Nurses 52
5.7 Assessment of Group Competencies 54
5.8 Assessment of Competencies related to Personal Capability 55
  5.8.1 Overall Assessment of Competencies related to Personal Capability 55
  5.8.2 Analysis of Competencies Related to Personal Capability 56
5.9 Assessment of Competencies Related to Knowledge 59
  5.9.1 Overall Assessment of Competencies related to Nursing Knowledge 60
  5.9.2 Analysis of Competencies Related to Nursing Knowledge 61
5.10 Assessment of Competencies Related to Skills

5.10.1 Overall Assessment of Competencies related to Skills

5.10.2 Analysis of Competencies Related to Skills

5.11 Assessment of Competencies Related to Relationships

5.11.1 Overall Assessment of Competencies Related to Relationships

5.11.2 Analysis of Competencies Related to Relationships

5.12 Assessment of Competencies related to Stress Management

5.12.1 Overall Assessment of Competencies Related to Stress Management

5.12.1. Analysis of Competencies Related to Stress Management

5.13 Assessment of Job Performance based on Clinical Posting

5.14 Assessment of Job Performance based on Clinical Posting

CHAPTER SIX : DISCUSSION AND RECOMMENDATIONS

6.1 Introduction

6.2 Gap Analysis

6.3 Recommendations

6.3.1 Selection of Candidates for Nursing
6.3.2. Improved conditions for Nursing Service in the Public Sector 84
6.3.3 Training 85
6.3.4 Continuing Nursing Education 88
6.3.5 Evaluation of Nurses 89
6.3.6 Malaysian Nursing Competency Standards 89
6.4 Conclusion 91

CHAPTER ONE

INTRODUCTION

1.1 Background

Nursing forms an integral part of patient care. From the time of Florence Nightingale who formalized nursing during the Crimean War, the nurse has played a major role in the healing process. This is exemplified by the saying ‘nursing back to health’. The nurse has been held in high regard in the community and nursing has been a popular choice as a career for women around the world. Malaysia is no different in this aspect. Nurses in Malaysia were trained abroad till mid-twentieth century when local institutions of learning took over.

1.2 The Nursing Function

Morrison, J. (2000) described the Nursing job as one that is driven by the needs of the patients, the needs of the patients’ family members, the needs of health care system as well as the needs of the society. The traditional doctor – patient relationship is now altered with the advent of specialization. The care of the patient now involves the coming together of a group of health care specialists in the clinical and support
