ABSTRACT

This study was conducted to investigate on the issue of non-academic employees’ job satisfaction level in Universiti Utara Malaysia. The main purpose of this study was to identify the influence of pay, recognition, and leadership towards job satisfaction. The dependent variable of this study was job satisfaction whereas the independent variables consist of pay, recognition, and leadership. This study was done through quantitative method in which data was collected using a set of questionnaire. The respondents for this study consist of Universiti Utara Malaysia non academic staff whereby a total of 60 respondents from Othman Yeop Abdullah Graduate School of Business, Awang Had Salleh Graduate School of Arts and Science, and College of Business, had taken part in the survey. The findings shows that there was positive significant between pay, recognition, and leadership towards job satisfaction. This shows that employees in Universiti Utara Malaysia were satisfied with their work. The findings of this study were of immersed benefits for Universiti Utara Malaysia and will enable the institution to gain better competitive advantage to compete with local and international universities.

Keywords: Job satisfaction, pay, recognition, leadership, job performance.
ACKNOWLEDGEMENT

First and foremost, I would like to express my deepest gratitude to my supervisor, Dr. Kamal Ab. Hamid. Thank you for the continuous strong support and guidance. His guidance, insight and encouragement made writing this study an incredibly enriching learning experience. The time that he has spent in every discussion session I really appreciated. Besides, he always gives useful feedback as well as valuable suggestions that I truly appreciate from the bottom of my heart. Furthermore, my gratitude also goes to my family for the financial supported and friends who had contributed ideas and necessary information. Last but not least, I would like to thank them for sharing their experience and knowledge as well as supporting this initiative.

Thank you.

CHAPTER 1

INTRODUCTION

1.1 Background of the study

Job is process of doing activities or task in order to get pay. According to Wrzesniewski, and Dutton, (2001), job consists of duties, responsibilities and tasks. It can be defined as specific and can be accomplished, quantified, measured and rate. However, if looked into wider perspective of job, it is related to roles and responsibilities of people who hold the position in their respective work environment. Once people looking for a job, it is actually a process of getting money for the effort they put toward the job. Every job has their uniqueness that will identify the knowledge, ability and skill of individual performance.
