Thesis Submitted to
Othman Yeop Abdullah Graduate School of Business,
Universiti Utara Malaysia,
In Partial Fulfillment of the Requirement for the Master of Sciences
(International Accounting)
PERMISSION TO USE

In presenting this project paper in partial fulfillment of the requirements for a Post Graduate degree from the Universiti Utara Malaysia (UUM), I agree that the Library of this university may make it freely available for inspection. I further agree that permission for copying this dissertation/project paper in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or in their absence, by the Dean of Othman Yeop Abdullah Graduate School of Business where I did my dissertation/project paper. It is understood that any copying or publication or use of this dissertation/project paper parts of it for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the UUM in any scholarly use which may be made of any material in my dissertation/project paper.

Request for permission to copy or to make other use of materials in this project paper in whole or in part should be addressed to:

Dean of Othman Yeop Abdullah Graduate School of Business
Universiti Utara Malaysia

Kedah Darul Aman
ABSTRACT

The issue revolving around corporate governance and financial performance has always been an essential and critical element for banking sector in Nigeria. Good corporate governance practices are regarded as important in reducing risk for investors, attracting investment capital and improving performance. Precisely, this study investigates the relationship between the corporate governance mechanisms (CEO tenure, board size and the audit committee size) and return on assets (ROA) was chosen as a measure of financial performance. Moreover, this study used firm size, leverage, bank age and management change as control variables. Furthermore, the research made use of secondary data obtained from the annual reports of twenty-one (21) banks listed in the Nigeria Stock Exchange for the year 2006 to 2009. The model of this study was theoretically found on the agency theory. In analyzing the data, this study utilized the panel data methodology on 21 banks with 68 observations. Based on the panel data results, the random effect model was used to examine the effect of the predictors on the financial performance measured by ROA. In Nigerian banks, the result indicates that the relationship between CEO tenure and ROA is positively significant. This study further found that the relationship between board size and ROA is positively insignificant. In addition to that, this study found that the relationship between audit committee size with ROA is negatively insignificant. Also, this study found that the relationship between firm size and ROA is negatively significant while the relationship between leverage, bank age and ROA were found to be positively significant. Finally, the outcome of the relationship between management change and ROA is positively insignificant. Besides providing suggestions for future research work, this study provides several recommendations for regulators and the Nigerian banking industry.

Keywords: CEO tenure, board size, audit committee size, corporate governance and financial performance
ABSTRAK

ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and Most Merciful. All my praises and gratitude to Allah, the Merciful, the creator and custodian of the Universe for His kindness, blessing and guidance which has provided me the strength to face all the tribulations and trials in completing this project. No amount of gratitude will suffice my Dad and my Mum who guide, natured me and brought me up as a Muslim and who laid down the solid foundation for my education dream turned into reality, thank you and God Bless. I am also grateful to all other members of my family and other well wishers whose prayers and support has been of tremendous help.

I would like to extend my appreciation to my supervisors in the person of Dr. Rohami Bin Shafie for his thorough supervision, encouragement, and willingness to support me throughout this study. I would also like to express my sincere gratitude for his enthusiasm and guidance. The completion of this study has been possible with his guidance. I owe a great deal of gratitude to Universiti Utara Malaysia for giving me the chance to pursue my higher education and to accomplish my purpose of getting this degree, as well as to whole Malaysia (government and friendly people).

Special thanks to my Uncle Alh Kabiru Ado K/mata for his supportive and encouraging assistance from day one to the end of my programme. I must make special mention of my brothers and sisters, Ado Bala K/mata, Muhammad Bala K/mata, Fatima Bala K/mata, Sa’adatu Bala K/mata and Aisha Bala K/mata. I pray that Allah protect and guide them through all their endeavors. I also wish to extend my appreciation to my academic mentors, friends and my professional colleagues who gave me moral support and advice, Prof Kabiru Isa Dandago, Prof Bashir Tijjani, Dr Murtala Aminu Ibrahim, Dr. Haslinda Bin Hassan, Dr. Kabiru Maitama Kura, Dr. Muktar Shehu Aliyu, Dr. Yusuf Ibrahim K/mata, Muktar Muhammad Abdulmumin, Aminu Habib, Tariq Garba Bala, Afgani Dalhatu Adamu, Ibrahim Umar Tofa, Bashir Shehu, Usman Muhd Zairo, Syayo Syafik Md Shahrul Shafiq, Sadiq Jimeta, Abubakar Tom, Nasiru Namama and all those who have assisted me in this study directly or indirectly, whose names are too numerous to be mentioned here, may Allah guide and protect them in all their endeavors, Ameen.

Finally, I wish to dedicate this study to my family as they are always being my strongest supporters. I am indebted to all my family members for their love and appreciation throughout my study.

Abdullahi Bala Ado

CHAPTER ONE

INTRODUCTION

1.1 Background to the study

Corporate governance is still a hot topic of great relevance to many researchers in various field of knowledge (Demirag & Khadaroo, 2011). It is an entire sequence of financial and regulatory mechanisms designed to reduce clashes of interest between the management and stakeholders of capital in the banks (Vafeas, 1999). Consequently, corporate governance aim at protecting the shareholders from the opportunistic behavior, and make the managers work hard to accomplish the interests of the owners particularly the shareholders in the organization (Kyerboah-Coleman & Biekpe, 2005).

Corporate governance in this manner refers to the procedures and structures by which the affairs of business and institutions are managed and directed, with the goal of enhancing shareholder’s value through improving corporate accountability and performance, while considering the interest of other shareholders (Jenkinson & Mayer, 1992).

The recent corporate failure around the world has strengthened the importance of corporate governance particularly in both developing and developed countries. The issue of corporate governance bounced to global business attention from virtual obscurity after a series of breakdowns of high profile corporations. Houston, Texas based energy giant, Enron and WorldCom the telecom behemoth, stunned the business world with both the age and scale of their illegal and unethical dealings. These organizations appeared to reveal only the tip of a dangerous iceberg (Shleifer & Vishny, 2007).
