AN EXPLORATORY STUDY ON SOCIAL ENGAGEMENT USING FACEBOOK AMONG HOTEL OPERATORS IN MALAYSIA

NAWAR ABOOD FADHIL

MASTER OF SCIENCE (INFORMATION TECHNOLOGY) UNIVERISITI UTARA MALAYSIA 2016
PERMISSION TO USE

In presenting this thesis in fulfilment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University’s Library may make it freely available for inspection. I further agree that permission for the copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence, by the Dean of Graduate School of Arts and Sciences, Awang Had Salleh. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part should be addressed to:

Dean Awang Had Salleh of Graduate School of Arts and Sciences

ABSTRACT

The use of social media has changed the way communication and interaction with each other and also with business companies such as how hotel industries take place. Currently, social media is the main tool in hotel industry in facilitating the marketing besides being used in engaging with customers. Indeed, recent studies had discovered that customers make decision largely based on the influence of user-generated content and word of mouth. However, there are limited studies which examined the use of Facebook as a tool to engage with customers especially in Malaysia. Thus, this study aims at exploring the use of social media among Malaysian hotels and how these hotels engage with customers through Facebook. Besides, this study also attempts to identify the metrics used by Malaysian hotels to measure the engagement of their customers. Data were collected through interview and content analysis over the Facebook page of selected hotels. The results had indicated that hotels use Facebook as an important communication tool to engage with their customers in various ways. Besides the benefits, this study also discovered some difficulties faced by the hotels when they communicate socially with their customers. On top of that, this study determined that hotels measure their engagement with customers through Facebook in two ways: (i) using software; and (ii) monitoring the page from inside. The results also had shown that some of the hotels are confused about the way to measure the engagement, in which they only focus on certain metrics while others are neglected. In a nutshell, Facebook pages of Malaysian hotels have a relatively weak engagement with customers especially in voice opinion and advocacy. In contrast, attitude expression has a moderate level.

Keywords: Social media, Facebook, benchmark, Malaysia, hotels.

Keywords: Media sosial, Facebook, penanda aras, Malaysia, hotel.
ACKNOWLEDGEMENT

In the name of Allah, the most Gracious the most Merciful, I would like to thank Allah the Almighty for His blessings and help in completing this research by giving me the strength and courage to accomplish this work.

I am truly grateful and in-debt to many persons that have encouraged me through this hard yet challenging journey. Whilst being grateful to all of them, I must register my gratefulness to some particular individuals. Special thanks to my supervisors Assoc. Prof. Abdul Bashah Mat Ali and Dr. Kamarul Faizal Hashim, who have guided me in every stage of the research process, and also provided constructive comments which had helped me in leading this work to the right track. I am praying to God to keep them safe from all harms. It has been an honor for me to work with them.

I would like to dedicate these years of hard work and persistence to my family members – My father and mother (God's mercy upon their souls), my second mother (Keffah), who endured many hardships to raise me. My warm thanks to my beloved wife (Jihan) for believing in me and for her patience and support. I also like to dedicate this work to my wonderful children Ahmed and Mayar.

Special thanks go to my brothers and sisters especially my elder brother Haider, my father and mother-in-law; my brothers and sisters-in-law for their love and support. My appreciation goes for my mentor, Prof. Dr. Jamal Al-Dabbagh for his kind friendship and prayers.

I would also like to thank (Dr. Nassir, Waleed, Abbas, Mohamed, Hamzah, Saif, Haitham, Ameen, Ali, Maher, Hussein, Ali, Hassan and Habib) and all my friends for their love and support, my goal would not be achieved without them.

I dedicated this hard work to all those whom enriched my life, they were a true blessing, God bless you all.

CHAPTER ONE
OVERVIEW

1.1 Introduction
The goal of this chapter is to address the context of this study. It begins with the background of the study, deliberating the problem statement and motivation, outlining the research questions, stating the research objectives, and underlining the scope of the study. It also expresses the summarize of the chapter.

1.2 Background
The role of Information and Communication Technology (ICT) in tourism industry plays a vital role as an effective marketing tool. Tourism is one of the major industries that have been benefiting from ICT. Previous studies (Buhalis, 2003; Frew, 2000; Liburd, 2005) discovered that ICT has been regarded as a tactical tool in helping and facilitating tourism development. Recently, Leue, Jung, and Knowles (2013) found that ICT with internet access is used in communication and sales in most sectors, including those related to tourism. In fact, Law, Leung, and Buhalis (2009) earlier discovered that ICT has become an important and crucial tool for competitive processes in the tourism industry and hotel operators, in addition to managing the marketing and distribution for firms universally. This means the process of managing, developing, and marketing tourism destinations and products has been diversified (DANTE, 2014). It is possible because the Internet is a huge repository of information (Khatri & Mittal, 2015) that offers a global reach, is easily accessible, is cost-effective and is convenient.
The contents of the thesis is for internal user only
