ABSTRACT

The main objective of this study was to examine and identify the factors that affect halal brand equity through the marketing lens. This study investigated factors such as advertising, pricing, company reputation, environmental turbulence with brand equity dimensions which are halal brand association, brand loyalty, perceived quality and halal brand equity which have not been given much research attention. In particular, the goal of this study was to determine how marketing efforts such as marketing elements, namely advertising, price, company reputation and environmental turbulence affect halal brand equity dimensions and how they affect or develop the overall halal brand equity. This was a quantitative study where a survey methodology was employed to collect the data. Individual consumers, were chosen as the sample for this study. The systematic sampling technique and intercept procedure were used to select respondents from individuals who shopped at four Hyper markets in the Klang Valley. Twenty-four main hypotheses were proposed to influence halal brand equity, but only ten hypothesis were supported. Structured questionnaires comprising 65 items were used to measure the variables; halal brand equity, marketing mix, company reputation and environmental turbulence were adopted in this study. The findings revealed that significant relationships exist among the variables (marketing mix; advertising, company reputation, environmental turbulence and halal brand equity) with halal brand equity. The findings also revealed that environmental turbulence moderated the relationships between perceived quality and halal brand equity, and perceived quality mediated fully the relationship between advertisement and halal brand equity. In conclusion, this study enhances the theories and models introduced such as the tawhidic paradigm, customer-based brand equity, the brand equity creation process model, service-dominant logic and the contingency theory put together.

Keywords: Halal brand equity, marketing mix, advertising, price, company reputation, environmental turbulence.

ABSTRAK

Objektif utama kajian ini adalah untuk menganalisis dan mengenal pasti faktor yang mempengaruhi ekuiti jenama halal dari perspektif bidang pemasaran. Kajian ini meneliti faktor seperti pengiklanan, harga, reputasi syarikat, pergolakan persekitaran dengan dimensi ekuiti jenama, iaitu asosiasi jenama halal, kesetiaan jenama, kualiti tanggapan dan ekuiti jenama halal yang masih kurang dikaji. Secara khususnya, matlamat kajian ini adalah untuk menentukan cara usaha pemasaran seperti elemen pemasaran, iaitu pengiklanan, harga, reputasi syarikat dan pergolakan persekitaran mempengaruhi dimensi ekuiti jenama halal dan seterusnya cara ia mempengaruhi atau membangunkan ekuiti jenama halal secara keseluruhan. Kajian berbentuk kuantitatif ini menggunakan kaedah tinjauan untuk mengutip data. Sampel kajian terdiri daripada pengguna perseorangan. Teknik pensampelan sistematik dan prosedur pintasan telah digunakan untuk memilih responden yang membeli belah di empat pasar raya besar di Lembah Kelang. Dua puluh empat hipotesis utama dicadangkan sebagai berupaya untuk mempengaruhi ekuiti jenama halal, tetapi hanya sepuluh hipotesis sahaja yang disokong. Kaji selidik berstruktur yang terdiri daripada 65 item telah digunakan untuk mengukur pemboleh ubah kajian, iaitu elemen pemasaran, pengiklanan, harga, reputasi syarikat, pergolakan persekitaran dan ekuiti jenama halal. Dapatkan kajian menunjukkan terdapat hubungan yang signifikan antara pemboleh ubah (elemen pemasaran, pengiklanan, reputasi syarikat, pergolakan persekitaran dan ekuiti jenama halal) dengan ekuiti jenama halal. Hasil kajian juga memperlihatkan bahawa pergolakan persekitaran menjadi penyederhana hubungan antara kualiti tanggapan dengan ekuiti jenama halal. Kualiti tanggapan didapati bertindak sebagai pengantara penuh hubungan antara pengiklanan dengan ekuiti jenama halal. Kesimpulannya, kajian ini mengukuhkan kefahaman terhadap teori dan model yang diperkenalkan seperti paradigma tauhid, teori ekuiti jenama berdasarkan pelanggan, model proses penciptaan ekuiti jenama, teori logik servis-dominan dan teori kontingensi.

Kata Kunci: Ekuiti jenama halal, campuran pemasaran, pengiklanan, harga, reputasi syarikat, pergolakan persekitaran.

BAB 1

PENDAHULUAN

1.1 Latar Belakang Kajian

Bancian terhadap penduduk mengikut anutan agama tidak boleh didapati dalam mana-mana negara kerana ianya adalah sukar, atau sama sekali mustahil, untuk memastikan ketepatannya (Pasim, 2010). Oleh itu, anggaran jumlah penduduk Islam dikira berdasarkan beberapa pangkalan data agensi-agensi multinasional (Pasim, 2010) dan juga pelbagai sumber melalui analisis sejarah yang mendalam. Penduduk Islam dunia dijangkakan akan bertambah dengan kadar 35 peratus pada 20 tahun akan datang di mana peningkatan dari 1.6 billion pada tahun 2010 kepada 2.2 billion pada tahun 2030, atau pun meningkat sebanyak 26.4 peratus daripada jumlah anggaran 8.3 billion penduduk di dunia dan pada tahun 2050 adalah dianggarkan penduduk Islam boleh mencapai jumlah 2.6 billion dan akan mewakili hampir 30 peratus dari anggaran keseluruhan penduduk dunia (Fleishman-Hillard Majlis, 2012) seperti yang ditunjukan di jadual 1.1. Manakala taburan penduduk Islam dunia tertinggi terletak di timur tengah dan Afrika utara seperti yang ditunjukan di rajah 1.1 di mana memiliki peratusan yang tinggi di antara 90 peratus hingga ke 100 peratus.
