ABSTRAK

Peniruan merujuk kepada pembuatan salinan ke atas tanda dagang, paten, dan hak cipta barang secara tidak sah tanpa mendapat kebenaran daripada pemilik sebenar yang bertujuan untuk meraih faedah yang ditawarkan oleh sesuatu produk berjenama. Peniruan produk merupakan satu fenomena yang telah lama wujud dan mendapat perhatian dalam kajian-kajian sebelum ini. Pengeluaran dan penjualan produk tiruan merupakan satu isu yang tiada akhirnya dan menjadi masalah yang semakin serius di pasaran antarabangsa amnya dan pasaran di Malaysia khususnya. Berlandaskan kepada Teori Tingkah laku Terancang, kajian ini memfokus kepada faktor-faktor yang mempengaruhi niat dan tingkah laku pembelian produk tiruan dalam kalangan pengguna di Malaysia. Kajian ini mengkaji perhubungan di antara sikap, pengaruh sosial, tanggapan kawalan tingkah laku, jangkaan bersalah dan pengalaman lepas terhadap niat dan tingkah laku pembelian produk tiruan. Kewujudan faktor pencelah dan faktor penyederhana dalam kajian ini membolehkan penerangan yang lebih terperinci berkaitan dengan faktor-faktor yang disebut serta keputusan hasil daripada kajian yang dijalankan. Kajian ini melibatkan seramai 392 responden di sekitar Kuala Lumpur, Pulau Pinang dan Johor Bahru yang mempunyai pengalaman membeli produk tiruan. Tujuh hipotesis telah diuji dan didapati enam daripada hipotesis tersebut disokong. Analisis menunjukkan kewujudan hubungan positif di antara niat dan tingkah laku pembelian produk tiruan. Sikap dan pengaruh sosial didapati mempengaruhi niat pembelian produk tiruan manakala tanggapan kawalan tingkah laku mempunyai hubungan positif dengan tingkah laku pembelian produk tiruan. Jangkaan bersalah menjadi hubungan pencelah antara sikap dan niat untuk membeli produk tiruan manakala pengalaman lepas menyederhanakan hubungan antara niat dan tingkah laku pembelian produk tiruan. Kajian ini juga menekankan implikasi penyelidikan, limitasi dan cadangan penyelidikan pada masa hadapan.

Kata kunci: produk tiruan, niat pembelian, sikap pengguna, Teori Tingkah laku Terancang, pengaruh sosial.

ABSTRACT

Counterfeiting refers to illegally making copies of trademark, patent, and copyright of product without permission from the owner with the aim to reap the benefits offered by a branded product. Counterfeiting is a phenomenon that has long been neglected in previous studies. Production and sale of counterfeit products is an issue that has no ending, and becoming an increasingly serious problem in the international market in general and Malaysian market in particular. Based on Theory of Planned Behaviour, this study focuses on the factors that influence the purchase intention and behavior among consumers towards counterfeit products in Malaysia. This study examined the relationships between attitudes, social influence, perceived behaviour control, anticipated guilt and past experience on intention and purchase behavior of counterfeit products. The consideration of putting both mediator and moderator factors in this research allow a more precise descriptions on the relationship between all the variables mentioned and the outcome of the research. This study involved 392 respondents in the area of Kuala Lumpur, Penang and Johor Baharu who have experience buying counterfeit products. Out of seven hypotheses tested, six were supported. The analyses revealed positive relationship between intention and purchase behaviour of counterfeit products. Attitudes and social influence have positive relationships with intention to purchase counterfeit products while perceived behavioural control has positive influence on purchase behaviour of counterfeit products. Anticipated guilt mediates the relationship between attitude and intention to purchase counterfeit products while past experience moderates the relationship between intention and purchase behaviour of counterfeit products. The study also highlighted implications of the study, limitations as well as suggestion future research.

Keywords: counterfeit products, purchase intention, consumer attitudes, Theory of Planned Behaviour, social influence.

BAB SATU

PENGENALAN

1.1 Pengenalan

Bab ini menerangkan gambaran keseluruhan mengenai latar belakang kajian, penyataan masalah, objektif dan soalan penyelidikan. Seterusnya diikuti dengan perbincangan mengenai sumbangan kajian ini, definasi terma yang digunakan dan skop kajian. Akhir sekali, bab ini diakhiri dengan perbincangan mengenai organisasi bab-bab seterusnya.

1.2 Latar Belakang Kajian

Isu peniruan produk atau lambakan produk tiruan bukan merupakan satu fenomena baru di Malaysia malah pasaran produk ini meliputi sekurang-kurangnya lima peratus daripada perdagangan dunia (Carpenter & Lear, 2011). Kajian mendapati bahawa nilai produk tiruan yang dipasarkan bagi setiap tahun di dunia telah melebihi USD 1 trilion pada 2007 (Trott & Hoecht, 2007) dan mencecah USD \$ 2 trilion pada 2010 (Turunen & Laaksonen, 2011). Sejak kebelakangan ini produk tiruan telah membanjiri pasaran seiring dengan perkembangan pasaran produk asli. Kajian yang dijalankan oleh Chaudary, Ahmed, Gill dan Rizwan (2014), telah membuktikan bahawa kemunculan fenomena ini telah memberi kesan negatif kepada ekonomi dunia.
