ABSTRACT

Pakistan being a developing country has a high rate of unemployment among young population. This present study examines the effects of entrepreneurial skills on developing entrepreneurial intentions of IT employee of Punjab, Pakistan. The study also examines the mediating role of attitude towards behavior, perceived behavioral control, and stakeholders’ support system in the relationship between entrepreneurial skills and entrepreneurial intentions. The probing into the literature of concepts and conceptualizations of the theories permitted a theoretical framework that identified the research issues and the research gap. The data were collected from IT employees working with SECP registered companies in Punjab, Pakistan using a cross-sectional study design. The study used simple random sampling technique to the selected 398 employees working with Information Technology (IT) companies in Punjab, Pakistan. For the initial data screening SPSS 20 was used, and then the Partial Least Squares Structural Equation Modelling (PLS-SEM) was employed to test the present study hypotheses. This study found the significant mediating effects of attitude towards behavior, perceived behavioral control, and stakeholders’ support system on the relationship between EPS, LS, MS, PMS, and TS and entrepreneurial intentions of IT employees in Punjab, Pakistan. The findings of this study further reveal that entrepreneurial intentions depend on the degree of EPS, LS, MS, PMS, and TS. The results of this study provide important insights to the policy making institutions, government, and the researchers to further understand the effects of entrepreneurial skills on developing entrepreneurial intentions and mediating role of attitude towards behavior, perceived behavioral control, and stakeholders’ support system. The findings of this research extended to the body of knowledge on entrepreneurial skills and entrepreneurial intentions in Pakistani context.

Keywords: entrepreneurial intentions, stakeholders’ support system, perceived behavioral control, attitude towards behavior, entrepreneurial skills.
Abstrak

Kata kunci: niat keusahawanan, sistem sokongan pihak berkepentingan, kawalan tingkah laku anggapan, sikap terhadap tingkah laku, kemahiran keusahawanan.
ACKNOWLEDGEMENTS

The most excellent words of praises are due to Allah (SWT) for helping and guiding me. May His peace and blessings be upon the prophet MUHAMMAD (SAW), his household and companions. I would like to thank and place on record my profound gratitude to my respected supervisor, Prof. Dr. Mohd Noor Mohd Shariff for his kind support and guidance throughout this study. He represents characteristics that a great supervisor should possess: being approachable, friendly and providing sincere and well-intentioned feedback. It was a great pleasure working under his supervision because of his kind directions, which have been very a great encouragement and have served as a source of inspiration in the completion of my thesis. I also extend my gratitude to Dr. Arfan Shahzad who has always been welcoming and supporting. Special regards and appreciation to him for his continuous support and encouragement in the completion of this study. Special thanks and appreciation to Prof. Dato Dr. Yuserrie Bin Zainuddin and Dr. Armanurah Mohammad, for their corrections that have contributed enormously to this study. I am indebted to my mother who sacrificed a lot but did not live to see this, may Allah (SWT) reward her with Jannatul Firdaus. Also, to my father, who has always been inspiration, I pray that you live longer with more Iman and benefit from this achievement. My appreciation goes to my wife and kids for their love, this journey would have been a lonely one without you, thank you. I would like to express my gratitude to all my brothers and sisters for supporting me with their hearts.

Alhamdulillah Rabil Alamin

CHAPTER ONE
INTRODUCTION

1.1 Background of the Study

1.1.1 Entrepreneurship

Entrepreneurship has become one of the most essential activities of modern economic life (Morelix, Reedy, & Russell, 2015). The need of entrepreneurship has increased in today's competitive environment (Kelley, Singer, & Herrington, 2016). It is consensus among policymakers and academics that entrepreneurship plays a significant role for the development and well-being of society (Amorós, Bosma, & Levie, 2013; Kelley et. al. 2016). Entrepreneurship has been recognized as a driving force and an approach to deal with the volatile business and economic conditions, sustainable advancement, supporting economic growth and development of the economy, creating employment for youth, and social well-being. Therefore, developed and developing nations have been paying lots of attention on entrepreneurship (Amorós et. al., 2013; Fairlie, Morelix, Reedy, & Russell, 2015). The term “entrepreneurship” has been used in a wider sense to denote all the persons either working in multinational companies, public sector, academia, or developing small and medium businesses (Busenitz, Gómez, Spencer, Busenitz, & Spencer, 2014; Amoros et. al., 2013; GEM, 2012; Looney, 2012; Robertson, Collins, Medeira, & Slater, 2003; Wu, 2009; Volkmann, 2009).

Among business sectors, small and medium enterprises (SMEs) have a large share in the economic growth, employment generation, and social well-being in every country (Fairlie et. al., 2015). Some recent studies such as Hussien (2010), Obaji (2014), and Kelley et. al. (2016), reported that the value and popularity of SMEs around the world account 90% of total companies, and provided 80% job opportunities in major economies

Dear Sir/Madam,

I am pleased to inform you of the aforementioned study, which is currently undertaken by UUM. Mainly this study aims to evaluate the effects of entrepreneurial skills in developing the entrepreneurial intentions among the employees of IT companies in Punjab, Pakistan. This is an academic research and will be helpful in understanding the factors affecting entrepreneurial skills. For this purpose. This is self-administered questionnaire and it will take 5-10 minutes to complete.
The analysis of all the questionnaires will provide the basis for identifying best practices, highlighting the key critical factors and building a proposed model for the implementation. I would highly appreciate your participation, since the success of the research is dependent upon receiving the maximum number of responses. Your response is very important and will be kept strictly confidential for the sake of knowledge. Your answers will of course be treated confidentially and the information will only be used for the purpose of this study. The questionnaire has been designed to make completion simple, easy, and speedy.

I am looking forward to receive your completed questionnaire as soon as possible and many thanks for your kind support and the cooperation.

Yours sincerely,

Supervisors:
Muhammad Salman Shabbir
