Abstract

Although there are numerous training programs have been conducted to employees at Chemicals Industry Sdn. Bhd, the number of accidents and customer’s complaints are still rather high. Hence, this qualitative study was carried out to study employee’s perspective of training effectiveness at Chemical Industry Sdn. Bhd. This study focuses on identifying factors that could influence the training effectiveness at Chemical Industry Sdn. Bhd. This study was conducted by using structured interviews session with 15 selected participants. The output of interviews was transcribed after each interview carried out and analysed by comparing each interview data to identify the mutual feedback that emerged. The data collected were analysed manually by using Excel sheet. Furthermore, for this study, Baldwin and Ford’s transfer of training model was used to support the research. The findings of the study show that training motivation, training design and working environment which were indicated in this model are the factors influencing the training effectiveness. However, the findings also indicated some new factors that could influence training effectiveness. This study has made some important contributions to the training effectiveness at Chemicals Industry Sdn. Bhd. from employee’s perspective.

CHAPTER ONE
INTRODUCTION

1.0 Introduction

This qualitative study was carried out to identify the factors contributing to training effectiveness from the employee’s perspective among operational employees in Chemicals Industry Sdn. Bhd.

Advancement in technology had led to rapid changes in global market, organizations with all sizes are more concerned to make the best sustainable business. A work carried out by an employee 10 years ago, has been changed with the presence of technology today. The existing technology has changed the business strategy, customer needs and product innovation. To strive global market, the organization must develop workforce that have chances to train employees for better performance in the workplace to produce superior quality of products and services. Therefore, training is a platform for an organization to transfer their objectives to employees by training and to shape employee’s skills and knowledge according to organization needs.

Generally, training provides employees the knowledge and the skills needed to do a task through change job attitude (Ghee et al., 2013). The focus of the training is more on what an employee should learn or to know. Each training has designed for a specific purpose to employees for specific job improvement which eventually contributes to the organization profitability.
