PERAKUAN KERJA TESIS
(Certification of Thesis Work)

Kami, yang bertandatangan, memperakukan bahawa
(We, the undersigned, certify that)

ZAFIYAH BT. HUSSAIN

calon untuk ijazah
(candidate for the degree of) Master of Science (Management)

telah mengemukakan tesisnya yang bertajuk
(has presented his/her thesis of the following title)

INTEGRATION OF GLOBAL NETWORK FOR VOICE AND DATA ENHANCEMENT

TO WORK QUALITY.

______________________________

seperi yang tercatat di muka surat tajuk dan kulit tesis
(as it appears on the title page and front cover of thesis)

bahawa tesis tersebut boleh diterima dari segi bentuk serta kandungan, dan
meliputi bidang ilmu dengan memuaskan.
(that the thesis is acceptable in form and content, and that a satisfactory knowledge
of the field is covered by the thesis).

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a post graduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or, in their absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean of Graduate School

Kedah Darul Aman
ABSTRAK

(BAHASA MALAYSIA)

Kajian ini dijalankan dengan tujuan untuk menganalisa hubungan di antara rangkaian global bersepadu dan mutu kerja di dalam organisasi. Kajian juga dijalankan untuk mengetahui bagaimana keputusan dan pengawalan kos yang berkesan berkait dengan peralatan telekomunikasi dan cara berkomunikasi. Data primer diperolehi melalui soalselidik Likert-type style yang telah diedarkan kepada 100 orang responden untuk kategori pengurus atas dan peringkat tengah di kawasan perindustrian Sungai Petani,Kedah Darul Aman.Kaedah penilaian data secara “Statistical Package for the Social Science” (SPSS) telah digunakan berserta penilaian diskriptif, penganalisaan faktor dan Pearson Correlation untuk mernguji hipotesis yang berkaitan.

Dari penganalisaan, didapatih bahawa 60% daripada responden bersetuju bahawa sistem komunikasi mempunyai kaitan dengan mutu kerja serta dibuktikan dengan ujian hipotesis yang signifikant untuk kedua-dua variabel. Peralatan telekomunikasi dan kaitannya dengan membuat keputusan adalah sebanyak 74% dan mempunyai hubungan yang signifikant antara kedunya. 57% daripada responden bersetuju bahawa cara berkomunikasi mempunyai kaitan dengan pengawalan kos yang berkesan dan juga telah dibuktikan dengan ujian korelasi yang signifikant terhadap hipotesis.

Hasil kajian menunjukkan bahawa dalam melayari era milenium yang semakin hampir,organisasi perlu bersedia untuk mengubah cara berkomunikasi sama ada dalaman atau luaran bagi meningkatkan mutu kerja dan seterusnya pencapaian keuntungan yang banyak. Kajian seterusnya haruslah dijalankan terhadap tajuk ini untuk memberi gambaran yang lebih jelas dan terperinci bagi menggalakan organisasi menuju kearah pembangunan perniagaan yang lebih maju.
ABSTRACT

(ENGLISH)

This study was undertaken to examine on the relationship between integrated global network and work quality in an organization. The study also examines on how decision making and cost effectiveness control relates to telecommunication equipment and method of communication used. The primary data was collected through Likert-type style questionaires and were distributed to 100 respondents of the top and middle managers in the industrial area in Sungai Petani,Kedah Darul Aman. “Statistical Package for the Social Science”(SPSS) was used in analyzing the data obtained,descriptive analysis, factor analysis and Pearson Correlation were use to test the hypotheses.

This study shows that 60% of the respondents agrees that communication system and work quality are related and this is further proof by the hypotheses test which shows a significant results between the two variables. For telecommunication equipment which related with decision making, a 74% of agreeable responds were tabulated and also significantly related between the variables. An amount of 57% of the respondents agrees that method of communication relates to cost effectiveness control and further justified with the significance in the Correlation test of the hypotheses.

From the results, it can be concluded that with the new millenium just a few steps away, organization should be prepared to change the way organization communication whether internally or externally so as to enhanced work quality and relatively profit increment. Further studies in this research is to give a more detailed and precise picture of the subject matter in order to stimulate organization to a more sophisticated way of business development.
ACKNOWLEDGEMENTS

The challenges of completing for the master of Science (Management) program could not have been met without the support and guidance of my supervisor Professor Madya Dr Ibrahim Abdul Hamed, Dean of the Graduate School, Universiti Utara Malaysia and En Abdul Rahim Bin Abu Bakar, lecturer, School of Management, Universiti Utara Malaysia. Their unfailing help, advice and effort is most appreciated and will be remembered always.

I would also like to express my deepest appreciation to my friends and colleagues in assisting and guiding me throughout the master program. Special thanks to my employer Tuan Haji Ahmad Raffie Bin Aziz in understanding and patiently supporting me in attaining this master degree. A sincere thanks to my supportive friends Rohana and Hariza for the willingness to assist me in the analysis of data which I would never have made it without them.

Appreciation is also extended to Universiti Utara Malaysia Library for providing resourceful materials and facilities. Finally, I thank my family for their support and understanding throughout the master program and being the major source of my life.

CHAPTER 1

Introduction

1.0 Definition Of Telecommunication

A pioneer in the field of telecommunications, Alexander Graham Bell was born in 1847 in Edinburgh, Scotland. He moved to the United States, settling in Boston before beginning his career as an inventor. Throughout his life, Bell had been interested in the education of deaf people. This interest led him to invent the microphone and in 1876, his "electrical speech machine" which we now call a telephone. News of his invention quickly spread throughout the country even throughout Europe. By 1878, Bell had set up the first telephone exchange in New Haven, Connecticut. By 1884, long distance connections were made between Boston, Massachusetts and New York City.

Bell imagined great uses for his telephone but would he ever have imagined telephone lines being used to transmit video images?

Since his death in 1922, the telecommunication industry has
