ABSTRACT

Information Technology (IT) has been extensively used by the Government to support its services to the public across a wide spectrum of government functions. Often, the public is unaware that IT is working 'behind the scene' to deliver these services. Nevertheless, the public has benefited from increased efficiency in the use of IT, for example, faster renewal of road tax or driving license and greater convenience in paying various utility bills at One-stop Payment Centers. The significance of modern information technology to good governance and public administration is apparent as well. Taking advantage of modern information technology to improve the quality and effectiveness of government's programs and services has been placed in a premium in many countries. It is believed that services could be delivered more easily and at less cost. In fact, effective and intelligent use of information technology has been an essential component of modern public administration. For that reason, we are try to interview with CEO Perlis State Information Technology Department to get a explanation about organization commitment on IT in Perlis State Secretary. We are also do the survey for 369 respondents of staff in Perlis State Secretary for support the research. In the question we are try to got they commitment and leader or top management commitment on IT application.

ABSTRAK

Teknologi Maklumat (IT) telah digunakan secara meluas oleh pihak kerajaan di dalam menyokong fungsi perkhidmatannya kepada awam dan juga memperluaskan fungsinya. Sering kali kita melihat orang awam tidak meyedari bahawa IT yang membantu memberikan perkhidmatan yang terbaik kepada mereka. Memang tidak dapat dinafikan, bahawa orang awam memperolehi kebaikan daripada peningkatan kecekapan penggunaan IT ini. Sebagai contohnya kecepatan mempabaruhi cukai jalan atau lesen memandu dan kemudahan yang baik untuk membayar bil di One Stop Payment Center. Kemodenan IT dengan jelas memberikan impak yang baik kepada kerajaan dan pengurusan awam. Dengan mengambil peluang peningkatan IT ini untuk mempertingkatkan kualiti dan kecekapan kerajaan, banyak negara telah meletakkan langkah ini sebagai yang paling utama. Ini adalah kerana penggunaan IT akan membuatkan sesuatu kerja menjadi lebih senang dan mengurangkan kos. Secara realitinya, kecekapan dan kebijaksanaan menggunakan IT adalah menjadi satu kompenen keperluan untuk mejadikan pentadbiran awam yang moden. Dengan kesedaran itulah, kami telah menemurah dengan CEO Bahagian Teknologi Maklumat Kerajaan Negeri Perlis, untuk memdapatkan penjelasan mengenai komitmen organisasi terhadap IT di Setiausaha Kerajaan Negeri Perlis. Kami juga telah membuat kajian terhadap 369 orang responden di kalangan staf untuk menyokong kajian kami. Di dalam soalan-soalan kajian ini kami telah cuba mendapatkan mengenai komitmen mereka dan juga orang atasan di dalam penggunaan IT di organisasi ini.

DEDICATION

To my beloved wife, Sarina binti Hj. Shuib, and my children, Muhammad Afiq, Nur Afiqah, Muhammad ‘Adli and Muhammad Arman, my late father Haji Wan Sulaiman bin Wan Alang, my mother Hajjah Chik binti Saad and the rest of my family as well as my lecturers, colleagues and finally to all my staff in State Development of Perlis who had always encourage me to achieve my best.

ACKNOWLEDGEMENTS

First and foremost I would like to express my sincere gratitude to my supervisors Mr. Shahmir Sivaraj bin Abdullah and Associate Profesor Dr. Mohd Sobri bin Hj. Minai who offered me their invaluable guidance and advice continuously throughout this project. My gratitude and thanks is also extended to all my friends in the class of Master Science Management and all lectures that have given me continuous encouragement. Without them, this project would have not been possible. I would also like to express my sincere appreciation and gratitude to yhe State Development Office Director Mr. Mohd Rosli bin Ramli, whose constant support and faith has motivated me to complete my study. I would like to thank YB. Dato' Mohiyuddin bin Che Jan State Secretary of Perlis, Mr. Faezan bin Omar Deputy State Secretary of Perlis, Puan Siti Hasnah Perlis State Secretary Offices's Information Techonology Director, for providing me with input as well as assisting and allowing me to conduct the research and using their departmental facilities. I also would like to thank my friends in UUM especially Mejar Azizul Hisham and Mohd. Shukor also my friend Mohd Najib for his support on my project. Last, but not least, I would like to express my gratitude to my family, especially my wife for her constant support, my children and my mother who are my source of inspiration, my brothers and sister and all the people who made this study possible. Lastly, I wish to thank God, for His Grace and His Mercy for allowing this success to take place.

CHAPTER 1

INTRODUCTION

1.1 Background of the Project Paper

At the early stage of computer application in government, computing power was largely concentrated at the operational level, for example data processing (DP), the first computer payroll systems deployed in 1954. The applications development were then directed towards support of administration and management involving decision-making of authority (Thomas, 1993). The management information system (MIS) and decision-making support system (DSS) are example of the application development that are still popular until now.

Before 1980s, many governments have been making an effort on computerizing their business process, i.e using computers to automate or aid business activities as much as possible. Since the early nineties, there are two significant developments taking place in the use of information technology. Firstly computers are crowding into millions of families and secondly the emergence and development of the internet and intranet technology.

The former implies that the role of the computer in human society has been extended dramatically – not only as computing power and information processing within the institutions and enterprises but also within the home system for information retrieval
