PERMISSION TO USE

In presenting this thesis in fulfilment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the Universiti Library may make it freely available for inspection. I further agree that permission for the copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence, by the Dean of Awang Had Salleh Graduate School of Arts and Sciences. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean of Awang Had Salleh Graduate School of Arts and Sciences

UUM College of Arts and Sciences

Universiti Utara Malaysia

06010 UUM Sintok

ABSTRAK

Pembelajaran mudah alih (m-pembelajaran) adalah dianggap sebagai bentuk e-pembelajaran yang menggunakan teknologi mudah alih untuk memudahkan pendidikan guru dan pelajar bagi sebarang tempat dan masa.. Penggunaan perkhidmatan m-pembelajaran dalam pendidikan tinggi di Malaysia dapat meningkatkan peluang dalam bidang pendidikan. Kesedaran pelajar terhadap penggunaan teknologi merupakan kunci kejayaan bagi sesuatu penerimaan. Penyelidikan ini bertujuan untuk mengkaji penerimaan dan penggunaan perkhidmatan m-pembelajaran di kalangan pelajar pendidikan tinggi Malaysia. Objektif utama adalah untuk mencadangkan model penerimaan pelajar bagi m-pembelajaran dalam persekitaran pendidikan tinggi. Bagi mencapai objektif tersebut, kajian ini menyelidik tahap penerimaan pelajar terhadap keinginan tingkah laku untuk menggunakan m-pembelajaran dan kesannya kepada tingkah laku penggunaan di peringkat pendidikan tinggi. Selain itu, kajian ini menyelidik tahap keperluan untuk menggunakan perkhidmatan m-pembelajaran di peringkat pendidikan tinggi. Ia menyediakan asas pengetahuan mengenai keadaan semasa kesedaran pelajar tentang perkhidmatan m-pembelajaran. Kajian ini mendapati bahawa persekitaran dan infrastruktur yang bersesuaian adalah faktor bagi menyebarkan dan menggunakan m-pembelajaran dalam persekitaran pendidikan tinggi. Tambahan pula, hasil kajian menunjukkan bahawa pelajar mempunyai pengetahuan yang mencukupi dan kesedaran untuk menggunakan teknologi tersebut dalam persekitaran pendidikan mereka. Walau bagaimanapun, halangan dan kekangan yang mungkin dihadapi semasa penggunaan sebenar pembelajaran mudah alih perlu dipertimbangkan. Keterbatasan m-pembelajaran bagi pendidikan juga mendapat perhatian dikalangan pelajar. Perspektif pelajar adalah sangat penting untuk tingkah laku penggunaan m-pembelajaran dalam persekitaran pendidikan tinggi. Dapatan kajian menunjukkan bahawa keinginan tingkah laku untuk menggunakan m-pembelajaran oleh para pelajar dalam persekitaran pendidikan tinggi mempunyai pengaruh positif ke atas tingkah laku pelajar. Oleh yang demikian, dengan adanya syarat tersebut akan lebih memudahkan pengaruh ke atas tingkah laku pelajar. Kajian ini mencadangkan beberapa faktor penentu yang penting terhadap keinginan tingkah laku untuk menggunakan m-pembelajaran dalam persekitaran pendidikan tinggi.

Kata Kunci: Perkhidmatan Pembelajaran Mudah alih, Model Penerimaan Pembelajaran Mudah alih dan Prototaip Pembelajaran Mudah alih.

ABSTRACT

Mobile learning (m-learning) is considered as the next form of e-learning using mobile technologies to facilitate education for teachers and learners anywhere and anytime. Engaging the m-learning services in the Malaysian higher education could improve the availability of education. Students' awareness of such technology is a key for success acceptance. This research aims to study the acceptance and use of m-learning services among Malaysian higher education students. The main objective is to propose a students' acceptance model of m-learning in the higher education environment. The study investigates the students' acceptance of behavior intention to use m-learning and its effect on usage behavior in the higher education environment. It provides the knowledge base about the current state of students' awareness about m-learning services. The study found that both of the environment and the infrastructure are appropriate to diffuse and utilize m-learning in the higher education environment. Furthermore, the results showed that the students have adequate knowledge and awareness to use such technology in their education environment. The limitations of m-learning for education were well concerned by students. The students' perspective is very important to investigate the use behavior of m-learning in the higher education environment. Findings of the study suggest that the behavior intention to use the m-learning by students in the higher education environment have positive influence on the use behavior. Consequently, the availability of facilitating conditions is an important to influence students' use behavior. The study suggests several factors as important determinants of the behavior intention to use the m-learning in the higher education environment. Specifically, behavior intension to use appears to be adopted and facilitated by the usefulness of m-learning services, so more usefulness of m-learning leads to more acceptances among students in the higher education

Keywords: Mobile Learning Services, Mobile Learning Acceptance Model, Mobile Learning Prototype

ACKNOWLEDGMENT

By the Name of Allah, the Most Gracious and the Most Merciful

First, I would like to express my appreciation to Allah, the Most Merciful and, the most compassionate who has granted me the ability and willing to start and complete this study. I do pray to his greatness to inspire and enable me to continue the work for the benefits of humanity.

My most profound thankfulness goes to my supervisor PROF. DR. ABDUL RAZAK YAAKUB for his scientifically proven and creativity encouraging guidance. Thank for the ASSOC. PROF. ABDUL NASIR ZULKIFLI who shared us some international awards about the *Student's Mobile Information Prototype (SMIP)* (see Appendix J).

Last but not least, I wish to thank all my dearest family members, especially Mum, my Wife and My sons; Aseel, Omer, Majd, Belal, and Ahmed for being by my side since I left home for long time. To my friends who have given me moral support during my study.

Thanks you UUM.

CHAPTER ONE

INTRODUCTION

1.1 Introduction

This chapter provides an overview of the study background, problem statement, research questions, and objectives of the research. These are followed with discussion on the significance and contribution of the study. Scope of the study is identified and conceptual research framework is illustrated. Finally, this chapter ends with a discussion on the organization of remaining chapters.

1.2 Background of the study

In the recent years, mobile learning (m-learning) has moved from being a theory, academic exploration and technology idea, into a real and valuable contribution to learning environment (Stead, 2005) and during the past decade every area of education has been affected by the introduction and use of technology. Moreover, m-learning has coincided with the evolution of the era of online world (Downes, 2005). The rapid evolution of mobile technology leads to development of m-learning using wireless on mobile devices (Yordanova, 2007). Furthermore, the learning process evolves in parallel with the communication means development; it has developed from conventional face-to-face to become distance learning as well as e-learning (Keegan, 2002).

M-learning is an emerging form of e-learning that offers the opportunity for both teachers and learners to interact with educational material and services using
